changed, the pitch
hard, look after
every season.

01

Welcome to Noisers FC

A quick tour of what the app does and which part of it is meant for you.

- What the app is for
- The three areas
- Who can see what
- How information flows

What is this app?

Noisers FC is a small-sided football club that plays internal sessions: on match day, whoever turns up is split into balanced six-a-side teams, and those teams play a series of short games against each other. There's no outside opponent.

The Noisers FC app is the club's home online. It does three jobs:

1. **Show the club to the world:** a public website with the squad, player stats, weekly awards and photos.
2. **Keep players informed:** a private portal where every squad member can see their rating, form, stats and any fines they owe.
3. **Help the committee run the club:** tools for running match day at the pitch (timer, goals, cards), managing players and fines, and editing the website.

The best part: **you only enter things once**. When a committee member logs a goal on match day, the scorer's stats, the leaderboards, the website and the player portal all update on their own.

The three areas at a glance

Public website

Who should read which chapter?

YOU ARE...	READ THESE CHAPTERS
A fan or visitor	Chapter 3 (the public website)
A squad player	Chapters 3 and 4 (website and player portal)
A committee member	Everything, especially Chapter 6 (running a match day)
The club admin	Everything, including Chapter 9 (settings) and the Appendix

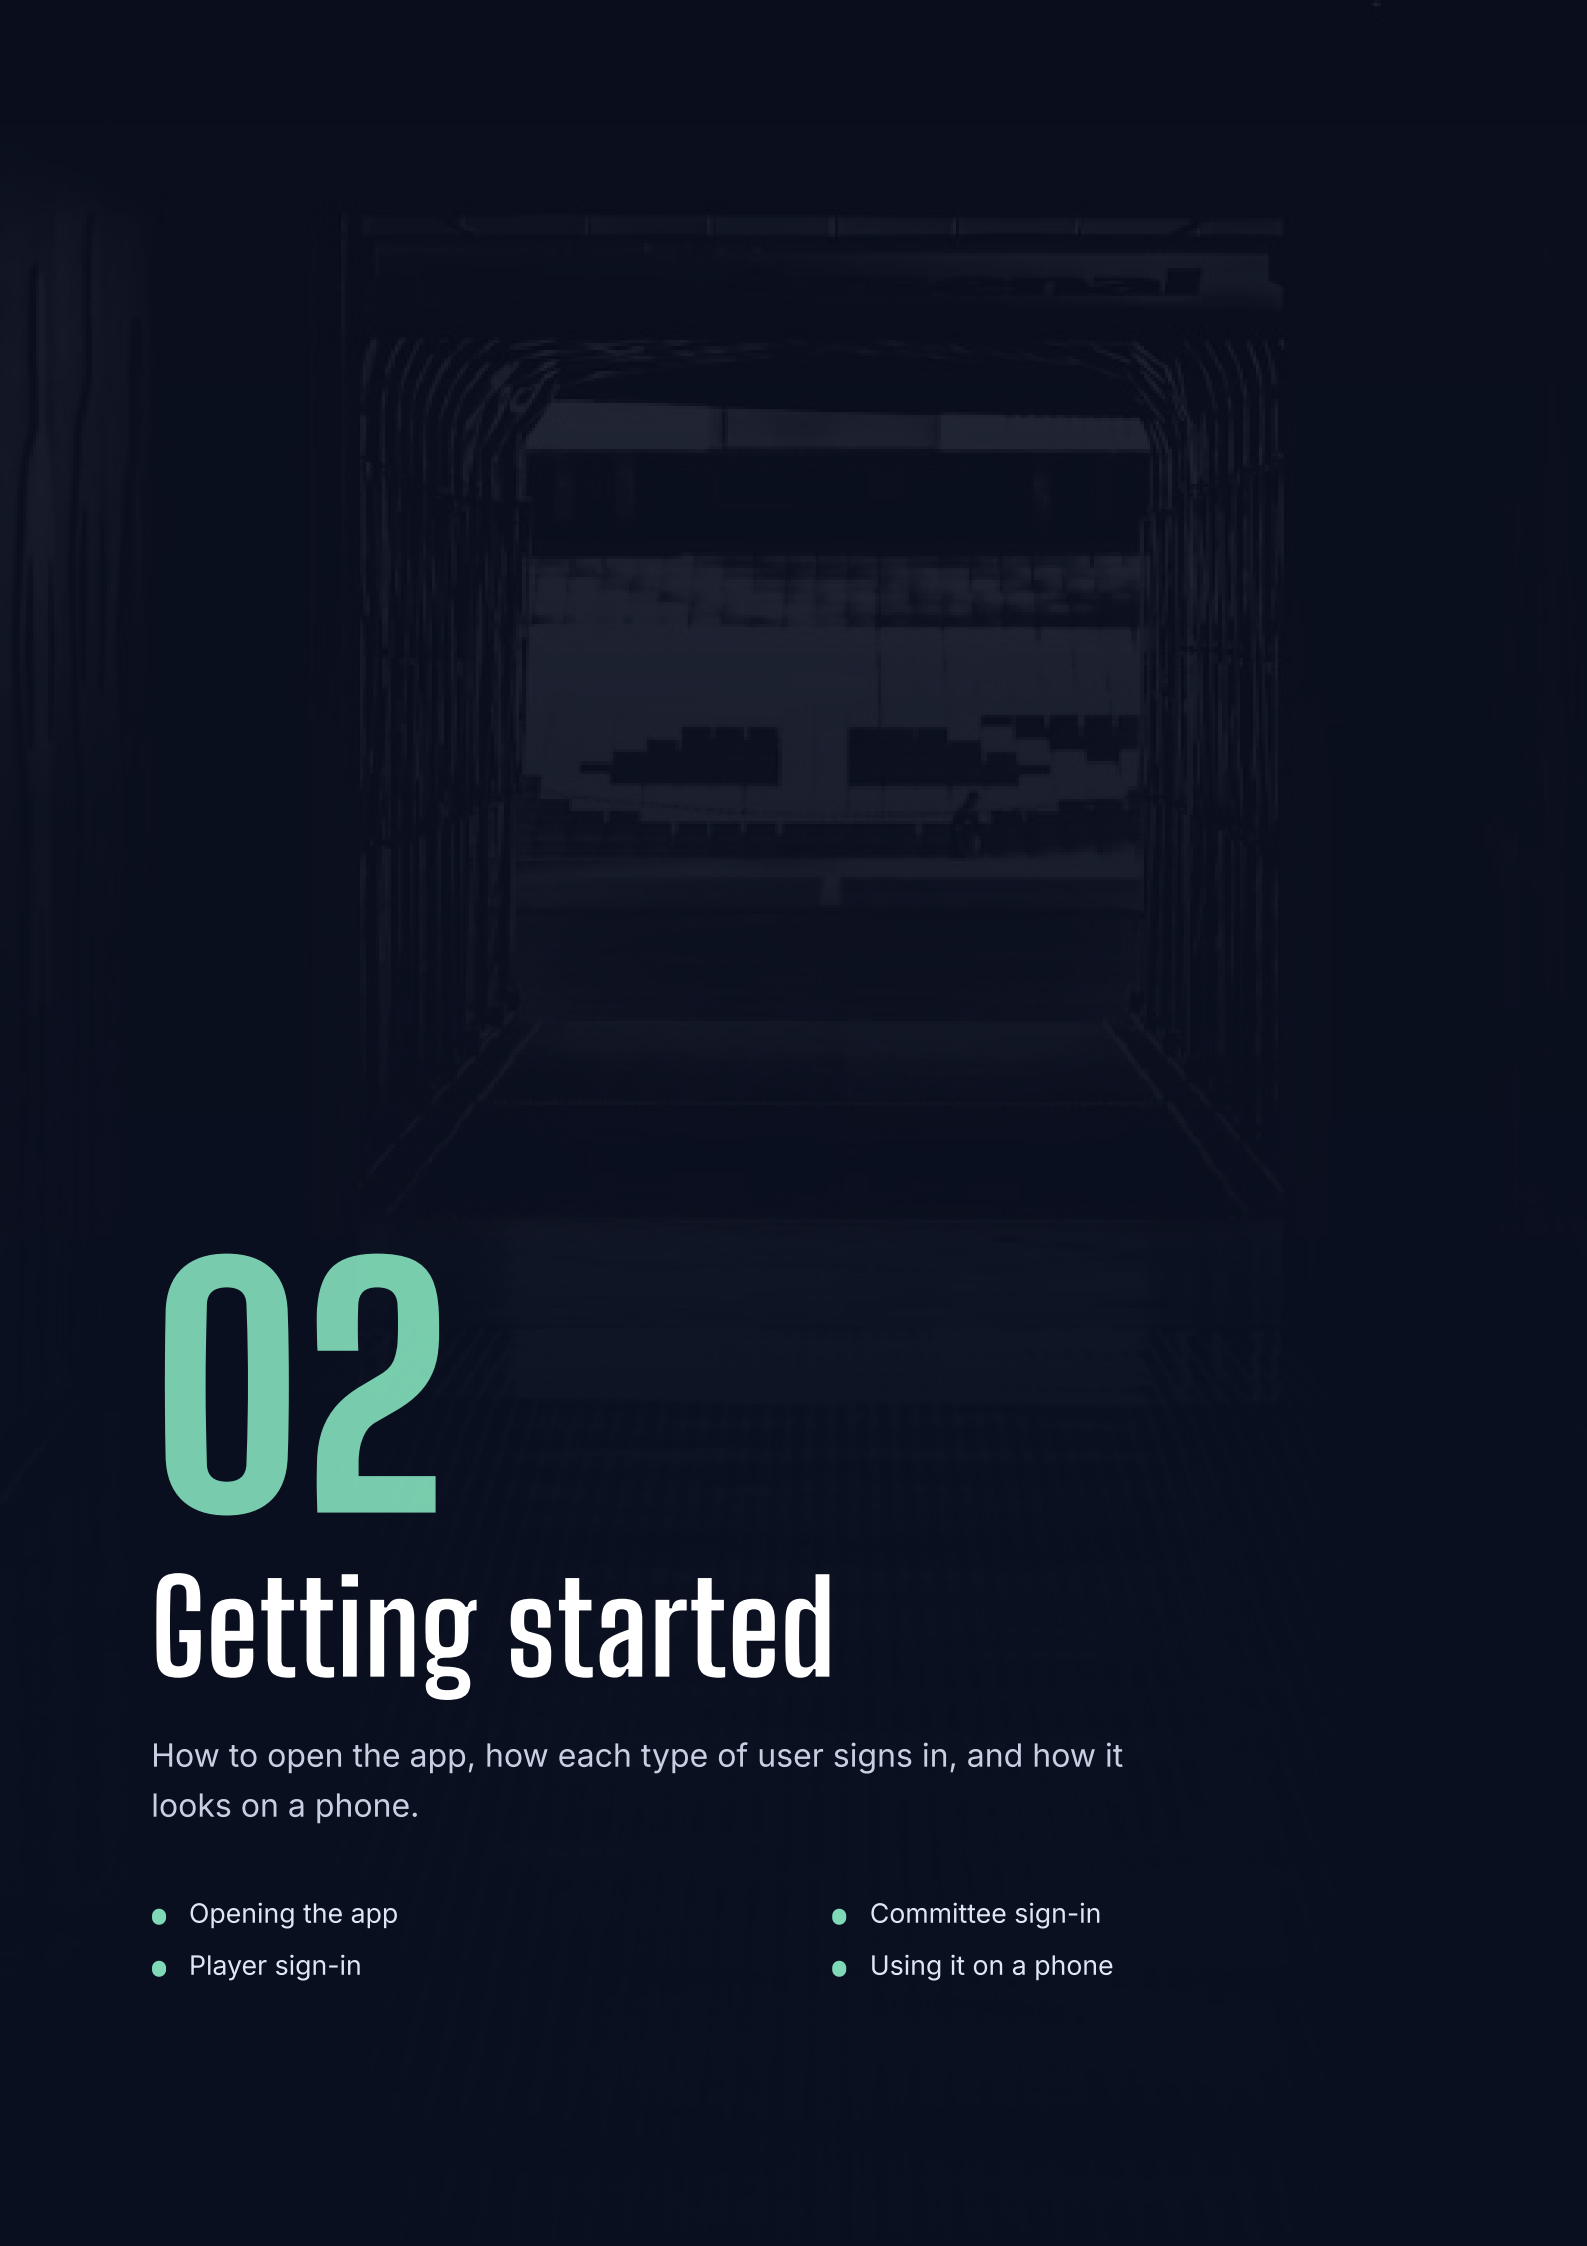

How information flows

Almost every number you see in the app comes from match days. Here's the journey from the pitch to the website:

Good to know

You never type in totals like "Marcus has 12 goals". The app works them out from the games you've logged, so they're always consistent.

02

Getting started

How to open the app, how each type of user signs in, and how it looks on a phone.

- Opening the app
- Player sign-in
- Committee sign-in
- Using it on a phone

Opening the app

The app runs in any modern web browser (Chrome, Safari, Edge, Firefox) on a computer, tablet or phone. There's nothing to install. Open the club's web address and you'll land on the home page.

Web addresses in this guide

Screenshots show the local test address `localhost:5173`. On the live site, replace that with the club's own domain. The page paths (such as `/squad` or `/admin`) stay the same.

Three ways in

WHO	WHERE TO GO	WHAT YOU NEED
Anyone	The home page (/)	Nothing: just browse
Squad players	Footer link Player login , or <code>/player-login</code>	The squad passcode, shared by the committee
Committee & admin	Top-right Club login , or <code>/login</code>	Your own email address and password

Player login

Type the squad passcode and press **Enter the portal**. Everyone in the squad uses the same passcode; ask a committee member if you don't have it.

Club (committee) login

Enter your email and password and press **Sign in**. Accounts are created by the club admin; there's no public sign-up.

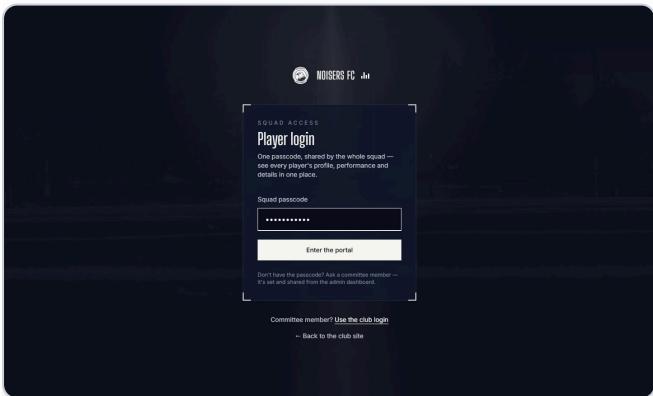

Fig 2.1 The player login screen

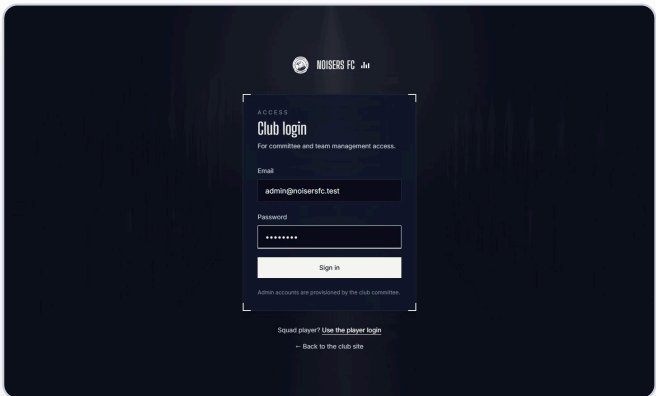

Fig 2.2 The club login screen

Keep sign-in details private

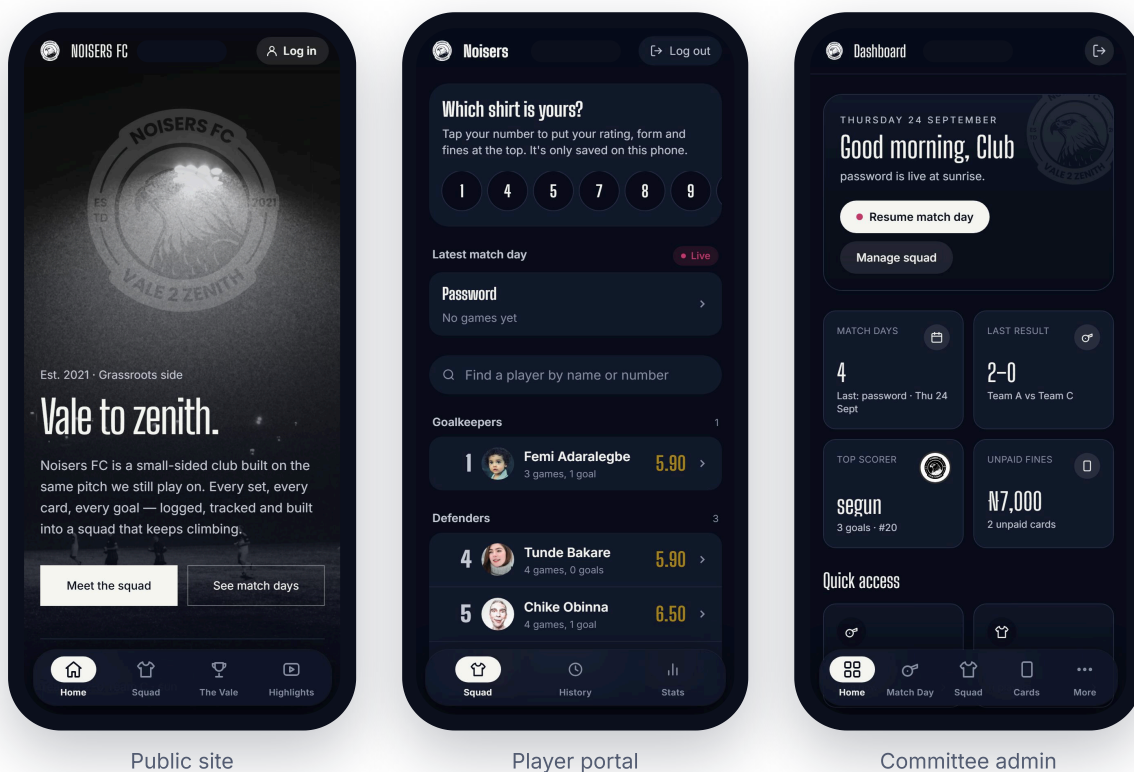

A fresh installation comes with a starter admin account (`admin@noisersfc.test` / `password`) and the starter squad passcode `vale2zenith`. Change both before the site goes live; see Chapter 9 and the Appendix.

Signing out

In the committee area, press **Log out** (top-right on a computer, or **More → Log out** on a phone). In the player portal, press **Log out** in the top bar. You stay signed in on a device until you log out, so always log out on shared computers.

Using the app on a phone

Every screen is designed to work on a phone. On small screens the menus move to a **tab bar at the bottom**, like a native app, so you can reach everything with your thumb. That matters most at the pitch, where committee members run match day from their phones.

Tip: add it to your home screen

On iPhone, tap Share → *Add to Home Screen*. On Android, tap the : menu → *Add to Home screen*. The app then opens full-screen with one tap.

03

The public website

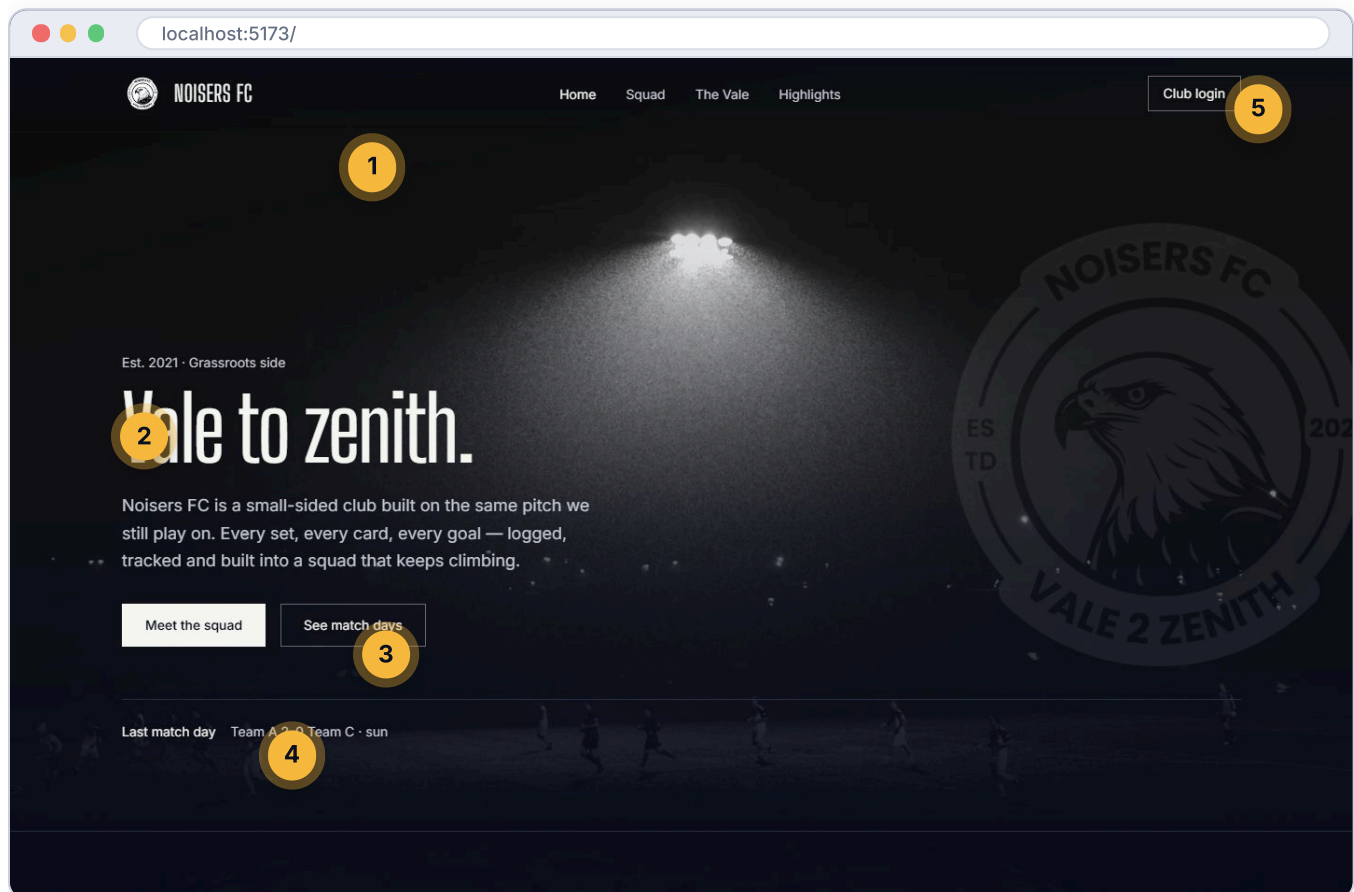

What fans, families and future players see. No login required.

- Home page
- The squad
- Player profiles
- The Vale: weekly awards
- Highlights
- Performance dashboard

The home page

The home page is the club's shop window. Scroll down and it tells the club's story from top to bottom. Every section updates automatically from match days, and the committee can change the words and pictures (Chapter 8).

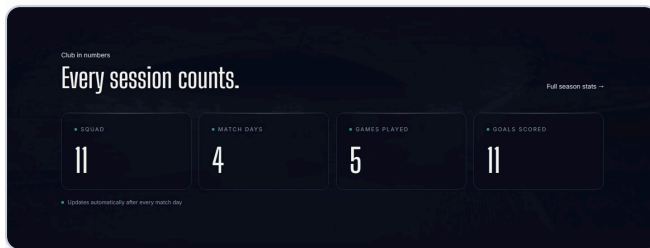

The top navigation takes you to [Home](#), [Squad](#), [The Vale](#) and [Highlights](#). The [Club login](#) button is for committee members.

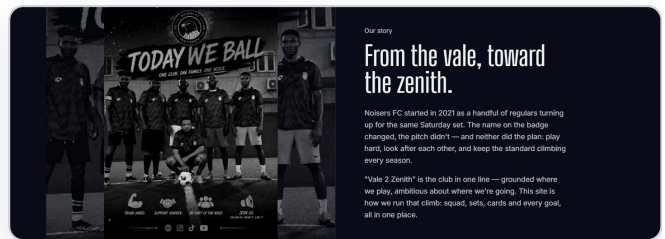

- 1 Main menu: Home, Squad, The Vale, Highlights
- 2 Headline and club introduction (editable)
- 3 Buttons to jump to the squad or match days
- 4 Result of the latest match day, updated automatically
- 5 Club login for the committee

Fig 3.1 The top of the home page ("hero")

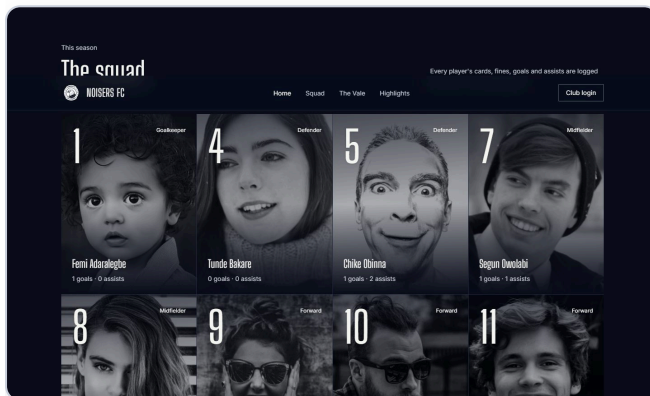

Scrolling down the home page

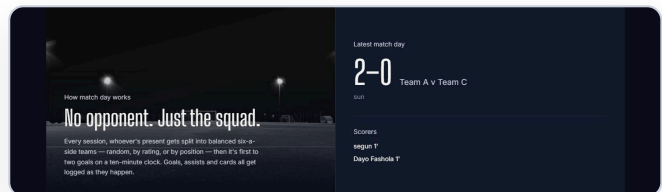

Club in numbers Squad size, match days, games and goals, counted live.

Our story The club's history in a paragraph or two.

The squad A preview grid of players with shirt numbers and stats.

Latest match day How match day works, plus the latest score and scorers.

Further down you'll find a full-width **atmosphere photo**, an **"On the pitch" photo strip** taken from the Highlights gallery, and the **footer**, which has quick links, including [Player login](#) and [Performance](#).

The squad

The **Squad** page lists every player with their rating, appearances, goals, assists and clean sheets. At the top, "**Best in position**" highlights the top striker, midfielder, defender and goalkeeper.

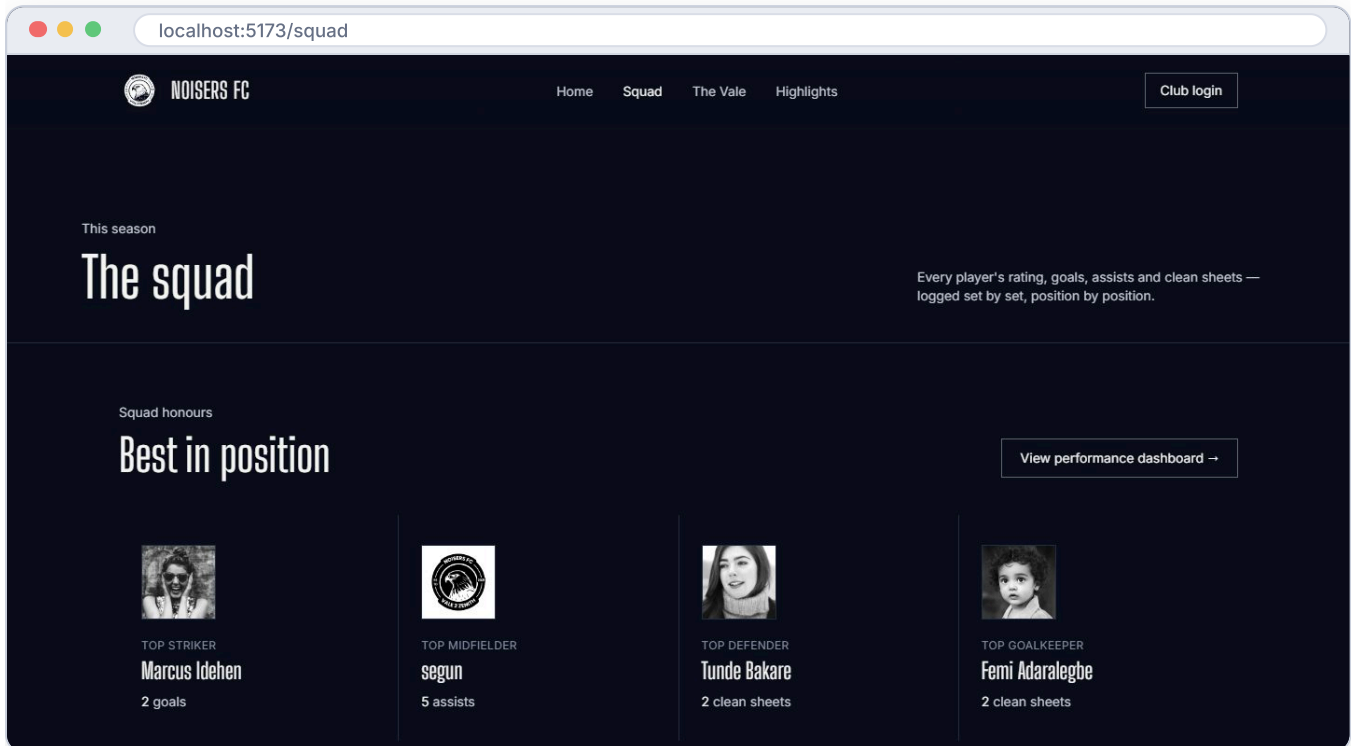

Fig 3.2 The Squad page with the "Best in position" honours

- Use the filter buttons (**All** , **Goalkeepers** , **Defenders** , **Midfielders** , **Forwards**) to narrow the list.
- Click any player to open their **profile**.
- **View performance dashboard →** opens the season overview (see below).

Player profiles

A player's profile shows their photo, headline stats, their **disciplinary record** (cards and whether fines are paid) and every match day they've played in.

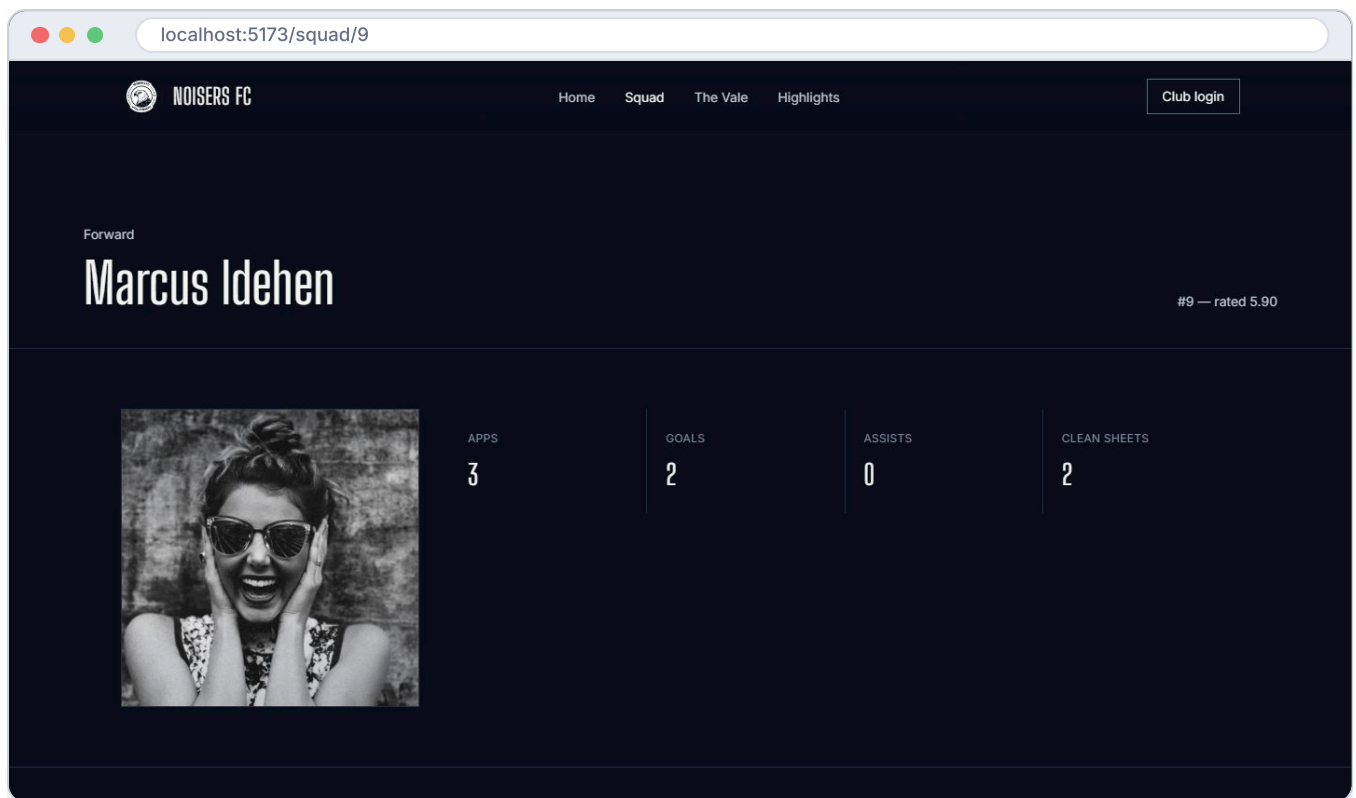

Fig 3.3 A player profile: stats, cards & fines, match days

The Vale: weekly awards

The Vale is the club's awards page. After every match day it shows:

Team of the week

The side that won the most games that day (ties broken by goal difference), with its line-up, rival and score.

1

Player of the week

The squad player with the most goals + assists (then goals, then clean sheets) that day.

Most improved

Of the players whose rating rose that day, the one who started lowest.

#

Weekly leaders

Top scorer, top assister and everyone who kept a clean sheet.

Use the **Match day** drop-down on the Team of the week panel to look back at earlier weeks.

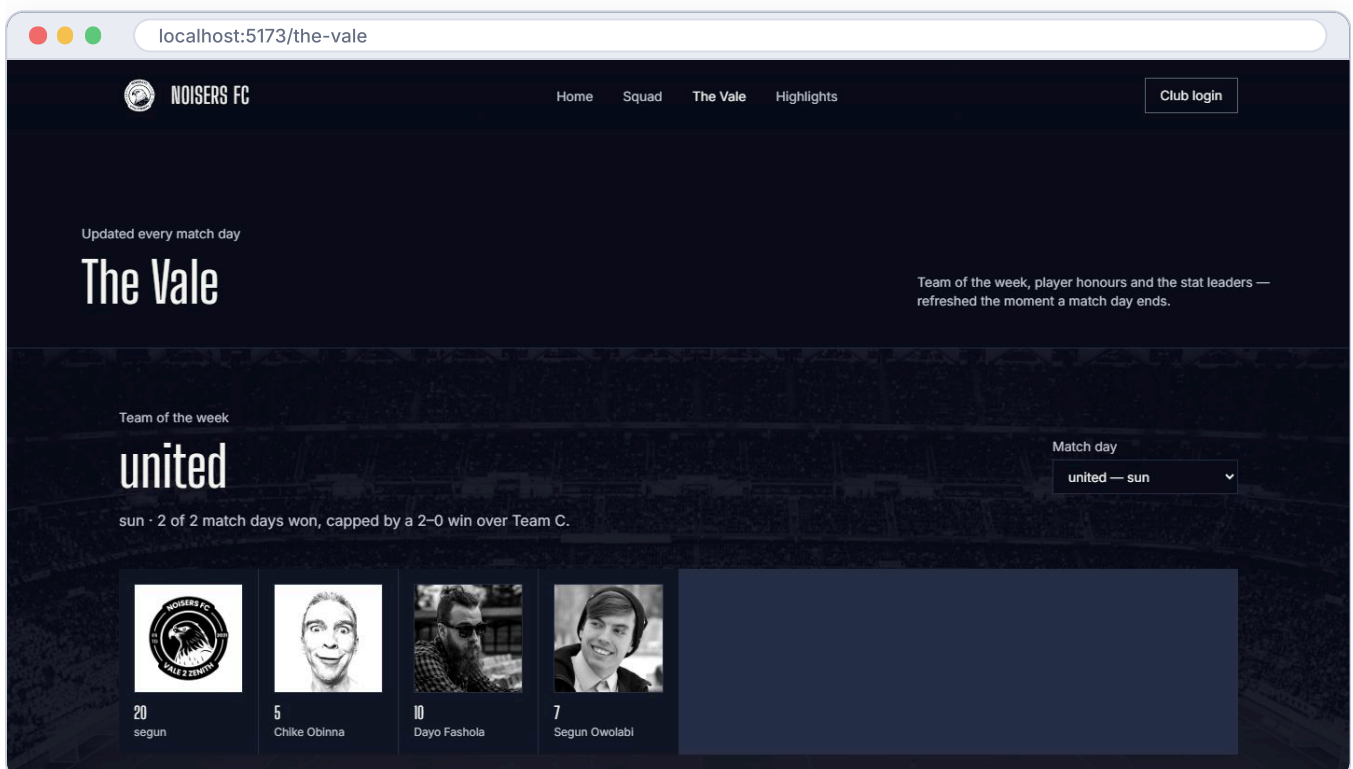

Fig 3.4 The Vale, updated automatically when a match day ends

Highlights

The **Highlights** page is the club's photo and video gallery. Filter it by category (**Videos** , **Goals** , **Saves** , **Skills** , **Matchday** , **Behind the scenes**). Committee members add items from the admin area (Chapter 8).

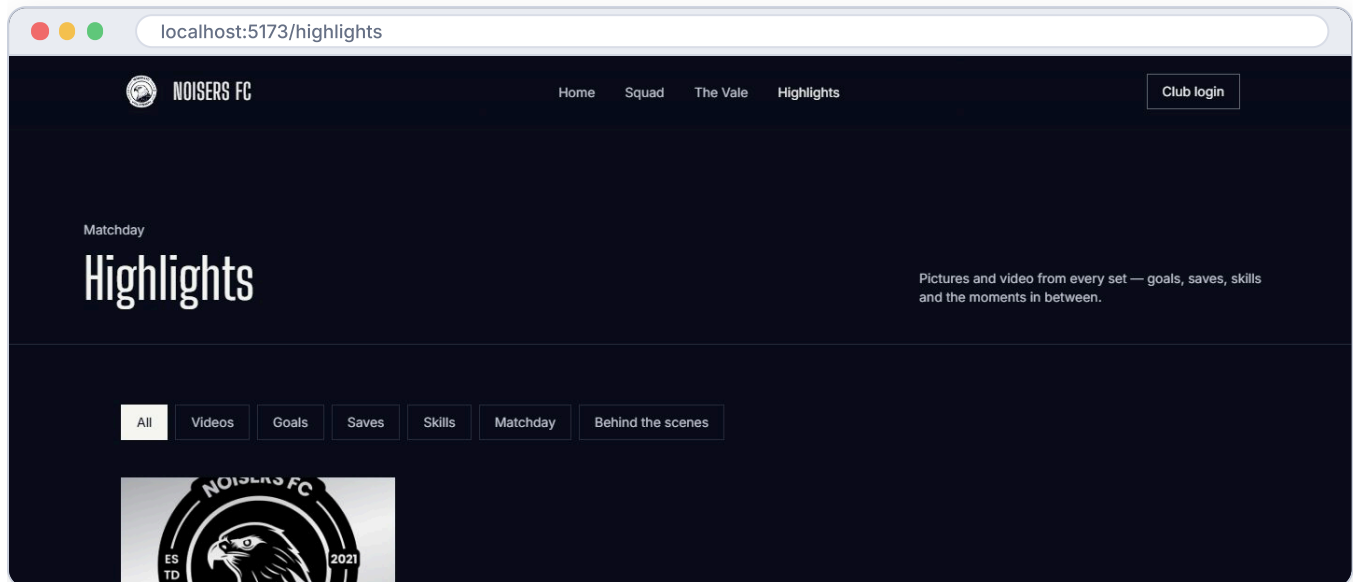

Fig 3.5 The Highlights gallery with category filters

Performance dashboard

Reached from the footer or the Squad page, **Performance** is the coach's view of the season: totals, recent match days, goal trends, leaderboards (top scorers, assists, clean sheets, highest rated) and a discipline summary.

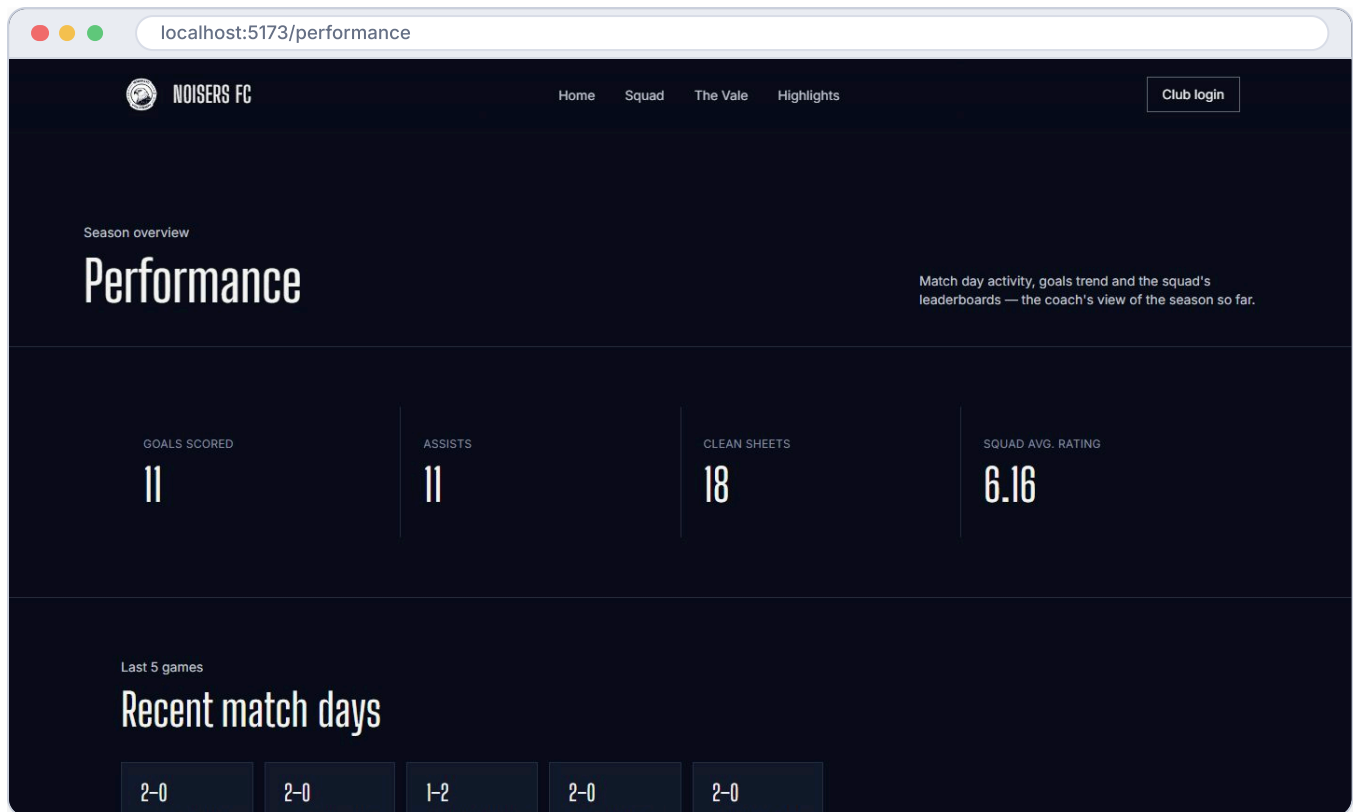

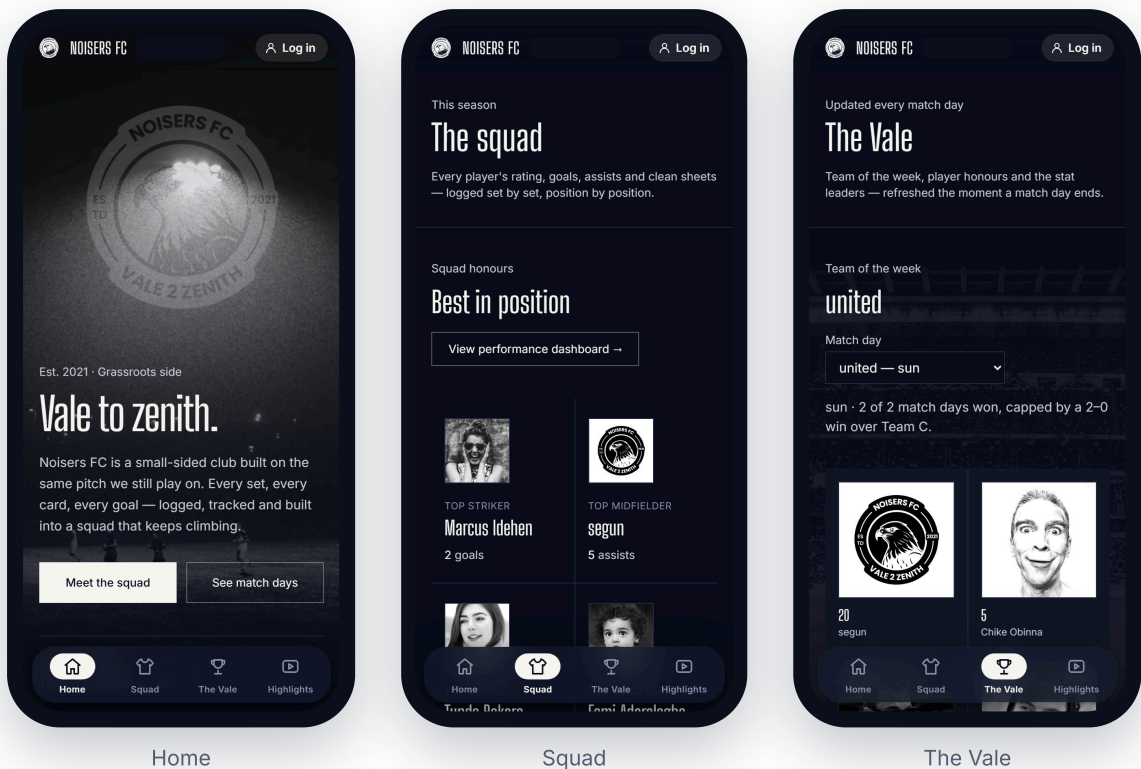

Fig 3.6 The season Performance dashboard

The public site on a phone

On a phone the top menu becomes a floating **tab bar** at the bottom of the screen: **Home**, **Squad**, **The Vale**, **Highlights**. The login button stays in the top-right corner.

Overview Games Form Fines

The player portal

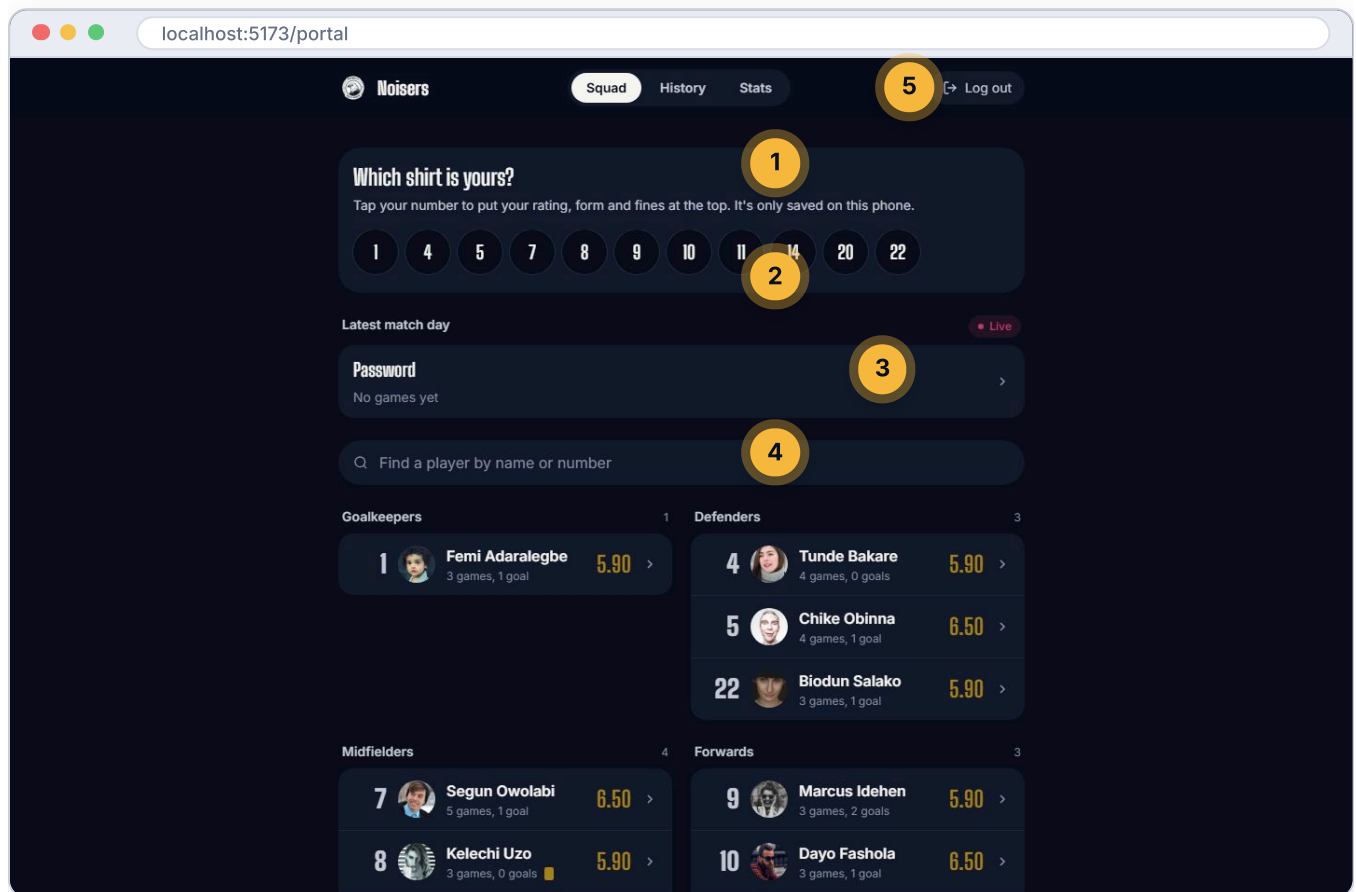

The squad's private area: your rating, your form, your fines, and every match day in detail.

- Signing in
- Pick your shirt
- Match history
- Match details
- Team stats
- Player pages

Welcome to the portal

Sign in at `/player-login` with the squad passcode (see Chapter 2). The portal has three tabs: **Squad**, **History** and **Stats**. When you open a match, a fourth **Match** tab appears.

Squad: find yourself first

- 1 "Which shirt is yours?" Tap your number
- 2 Latest match day (a red "Live" badge while it's on)
- 3 Search any player by name or number
- 4 The squad, grouped by position, with ratings
- 5 Tabs: Squad · History · Stats

Fig 4.1 The portal's Squad tab

Pin your shirt

Tap your shirt number once and your own rating, recent results and any fines owed appear at the top every time you open the portal. It's remembered **on that phone only**, so do it on each device you use.

Match history

The **History** tab lists every match day, newest first, with the score of each game. Filter with **All**, **Results** (finished) or **Live** (happening now). Tap a match day to see it in full.

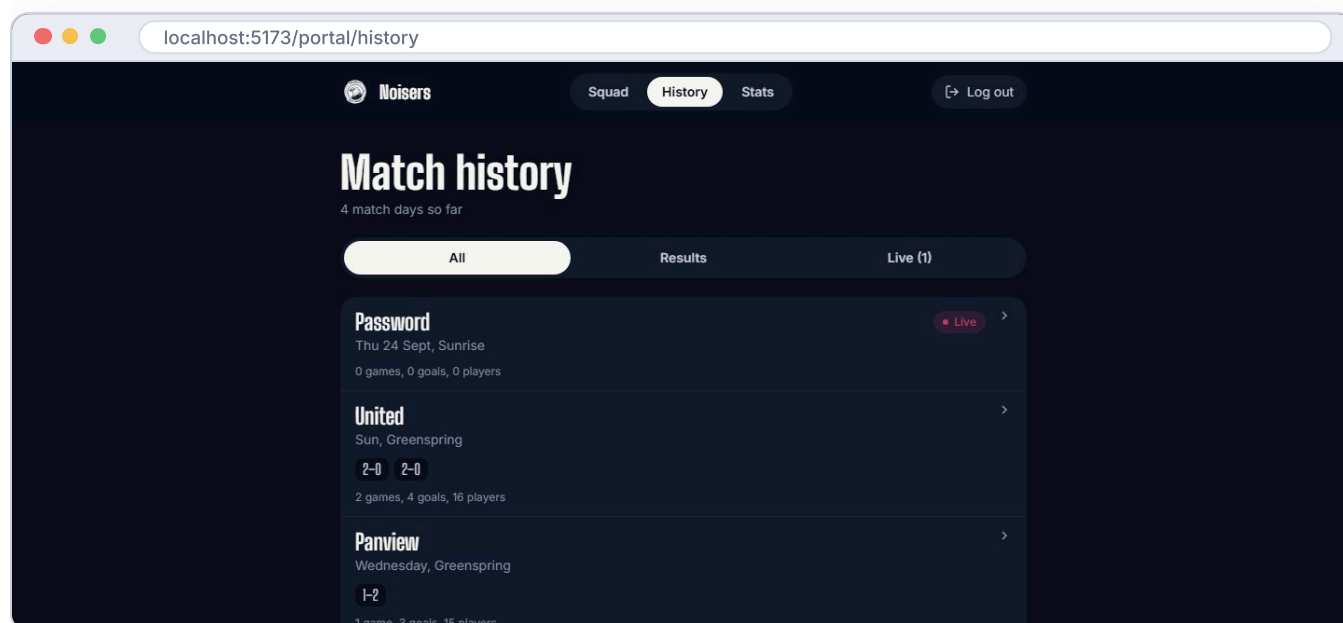

Fig 4.2 Every match day, newest first

Match details

A match day page shows the totals (games, goals, players), each game's score (tap **Show events** for goals and cards minute by minute), every player's goals, assists and cards for the day, and the teams.

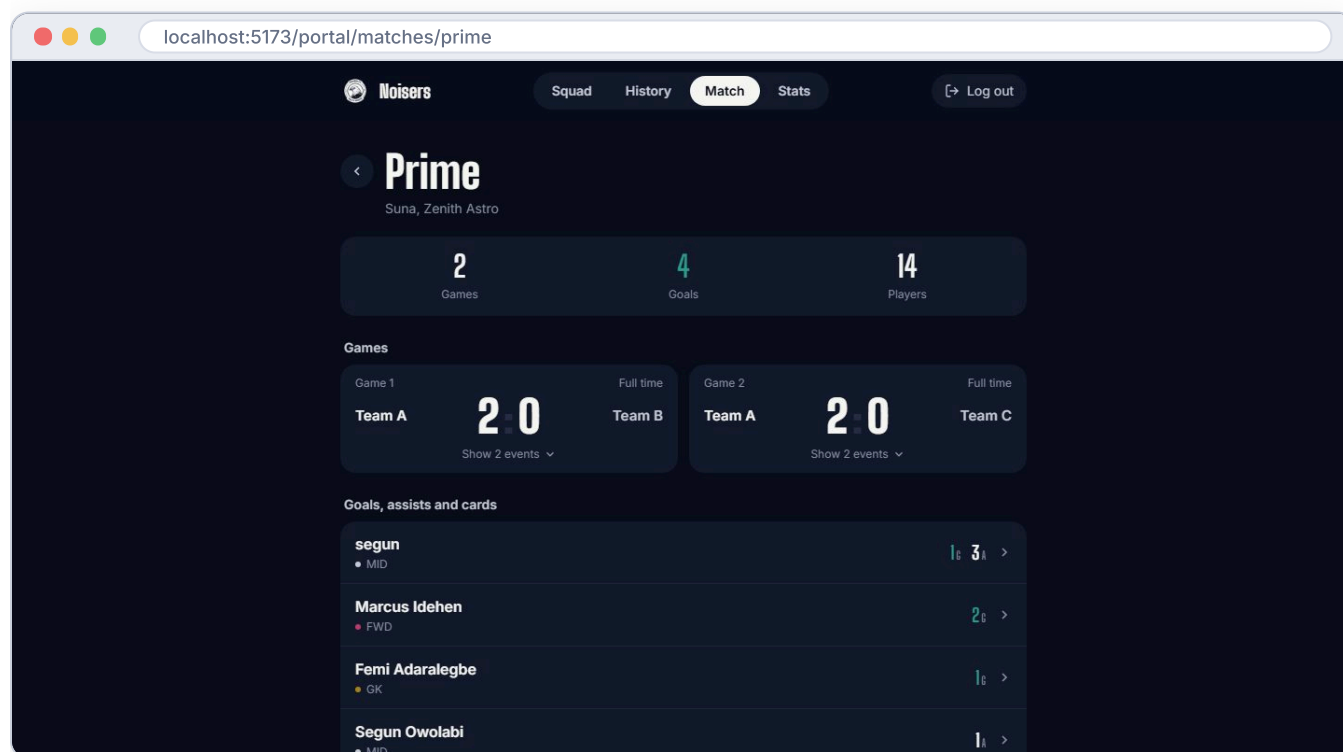

Fig 4.3 A single match day, broken down

Team stats

The **Stats** tab is the whole squad's numbers in one place, split into **Overview**, **Leaders**, **Positions** and **Activity** (the latest goals and cards).

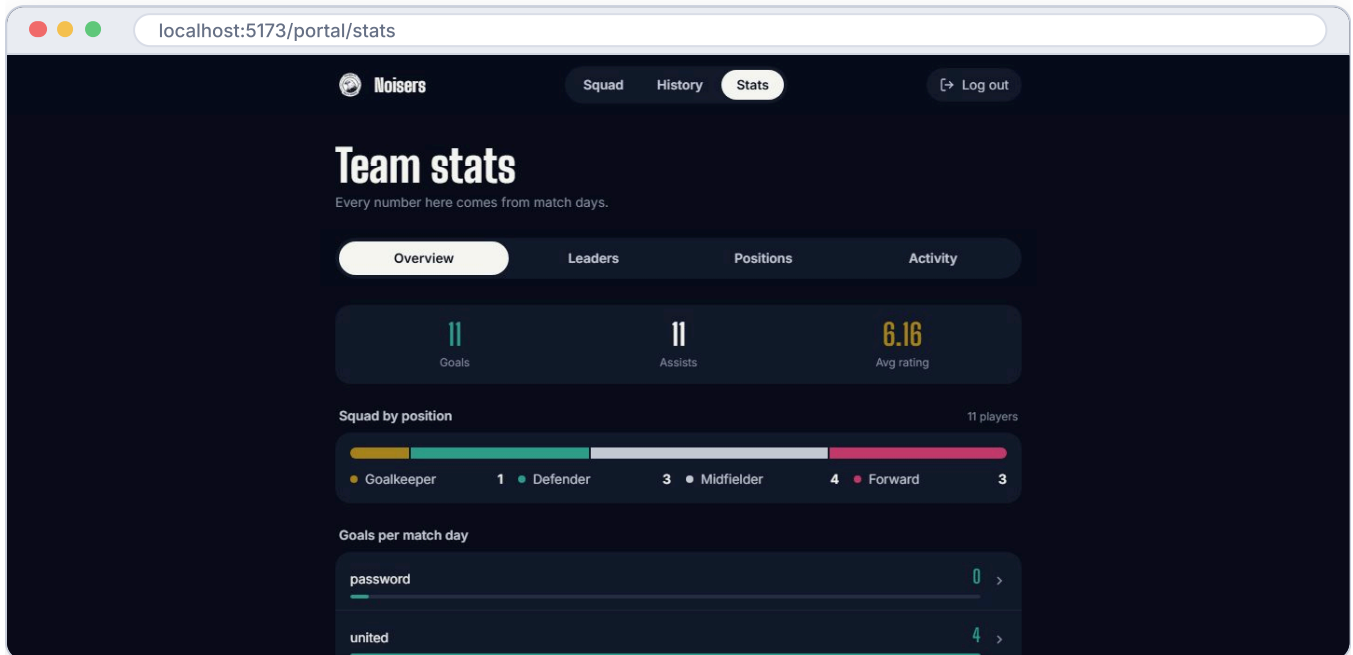

Fig 4.4 Team stats: squad by position and goals per match day

A player's page

Tap any player to see their **rating bar** (4.0 to 9.5), their last five results as coloured badges (Win / Draw / Loss), headline numbers, and four sections: **Overview**, **Games**, **Form** and **Fines**. On your own page, **This is me** pins your shirt.

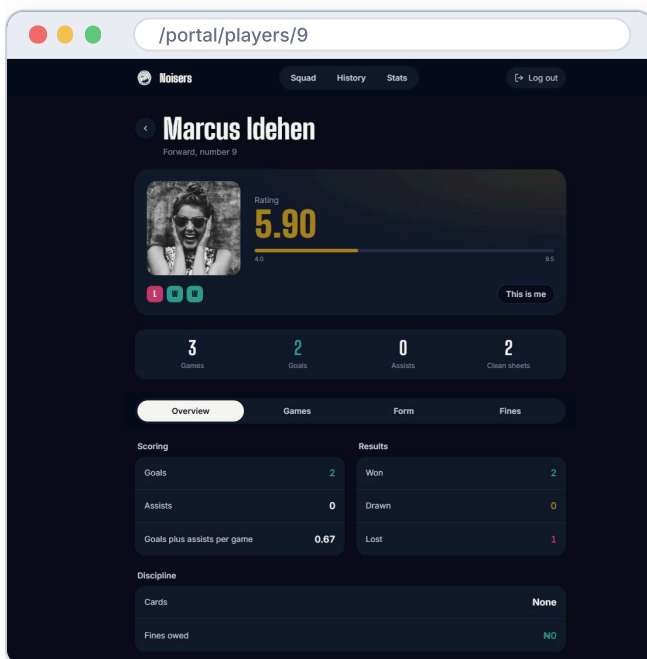

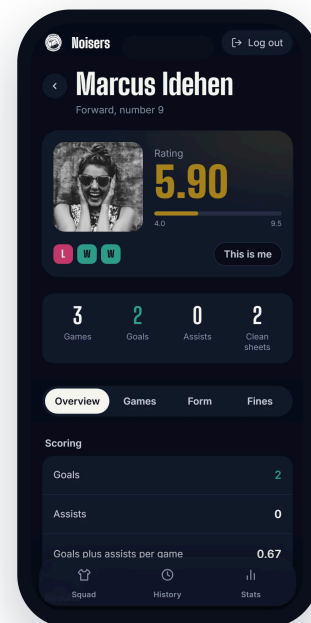

Fig 4.5 A player's page on a computer

...and on a phone

**Where do the numbers come from?**

Every number in the portal is worked out from match days logged by the committee. If something looks wrong, such as a missing goal, ask a committee member to check that match day.

Committee admin: the basics

For committee members and admins: signing in, getting around, and the dashboard.

- Roles: admin vs committee
- Getting around
- The dashboard
- Using it on a phone

Signing in and roles

Go to `/login` (or press **Club login**) and sign in with your email and password. There are two kinds of staff account:

ROLE	CAN DO
Committee	Everything day-to-day: run match days, manage the squad, cards and fines, edit website content. Can view Settings but not change them.
Admin	Everything a committee member can do, plus change Settings and use the Danger zone (permanently delete match days).

Finding your way around

The screenshot shows the 'Noisers FC' committee dashboard. At the top left is a sidebar menu with items: Dashboard (1), Squad, Matches, Match Day, Cards, Reports, Home Page, The Vale, Highlights, and Settings. At the top right, it says 'Signed in as Club Admin' (5) with a 'Log out' button. The main content area has a large greeting 'Good morning, Club' with the text 'password is live at sunrise.' and two buttons: 'Resume match day' (2) and 'Manage squad'. Below this are four summary cards: '4 MATCH DAYS' (3) with 'Last: password · Thu 24 Sept', 'LAST RESULT' showing '2-0' for 'Team A vs Team C', 'TOP SCORER' 'segun' with '3 goals · #20', and 'UNPAID FINES' '£7,000' with '2 unpaid cards'. At the bottom are three quick access tiles: 'Match Day' (4) 'Live now', 'Squad' '11 players', and 'Matches' '4 match days'. At the bottom left is a button 'Back to public site' (6).

- 1 Sidebar menu: every committee tool
- 2 Greeting, with **Resume** / **Start a match day**
- 3 Season at a glance: match days, last result, top scorer, unpaid fines
- 4 Quick access tiles to the main tools
- 5 Who's signed in, and Log out
- 6 Back to the public website

Fig 5.1 The committee dashboard

What each menu item does

MENU	USE IT TO...	CHAPTER
Dashboard	See the season at a glance and jump to common tasks	5
Squad	Add, edit or remove players; export the squad as a spreadsheet	7
Matches	Review every past match day in detail	7
Match Day	Run a live session: attendance, teams, timer, goals, cards	6
Cards	See all yellow and red cards, add cards and mark fines as paid	7
Reports	Season charts: goals, assists, ratings, positions, discipline	7
Home Page	Edit the words and pictures on the public home page	8
The Vale	Check or hand-edit the weekly awards	8
Highlights	Add photos and videos to the gallery	8
Settings	Fines, match rules, rating weights, passcode	9

The dashboard in more detail

The dashboard is your starting point. If a match day is in progress, the big button says **Resume match day**; otherwise it says **Start a match day**. Below the season numbers you'll find **Quick access** tiles, the **most recent cards** and the **top scorers**.

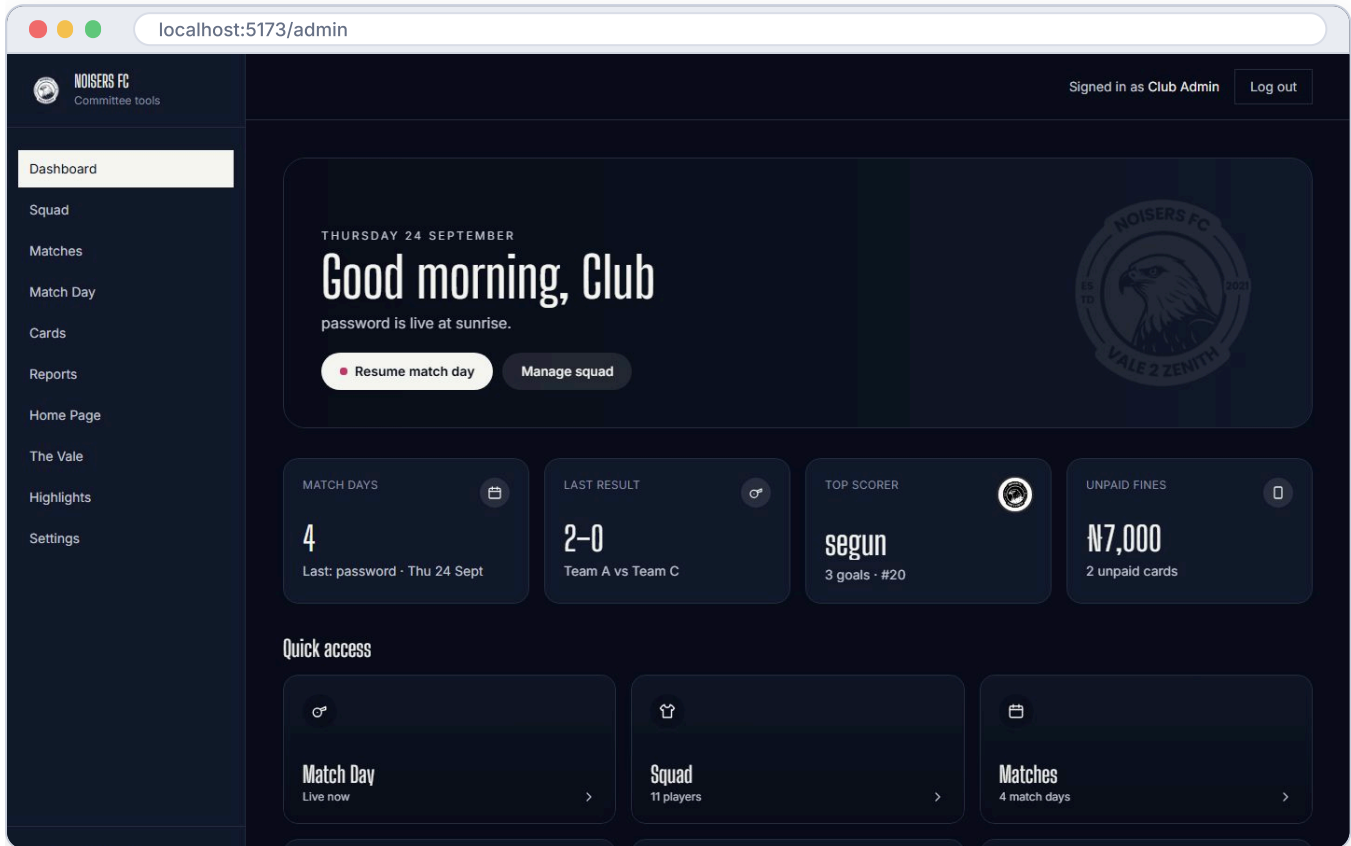

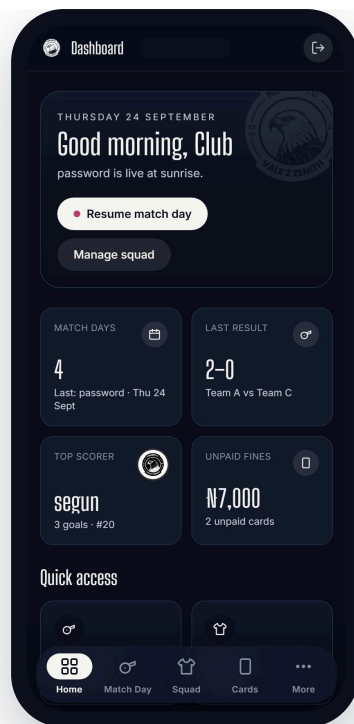

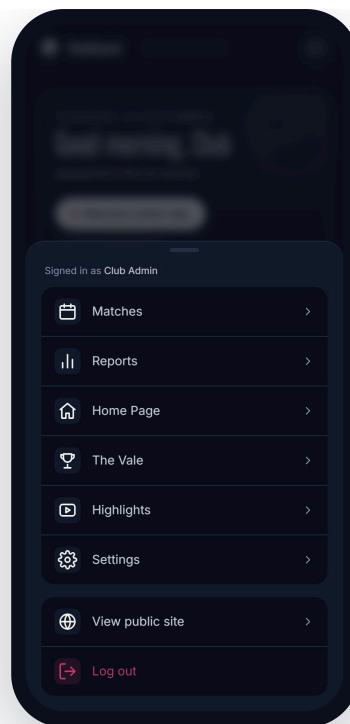

Fig 5.2 The full dashboard: season numbers, quick access, recent cards and top scorers

Admin on a phone

On a phone the four tools you need most at the pitch sit in the bottom tab bar: **Home**, **Match Day**, **Squad** and **Cards**. Everything else, including **Log out**, is under **More**.

06

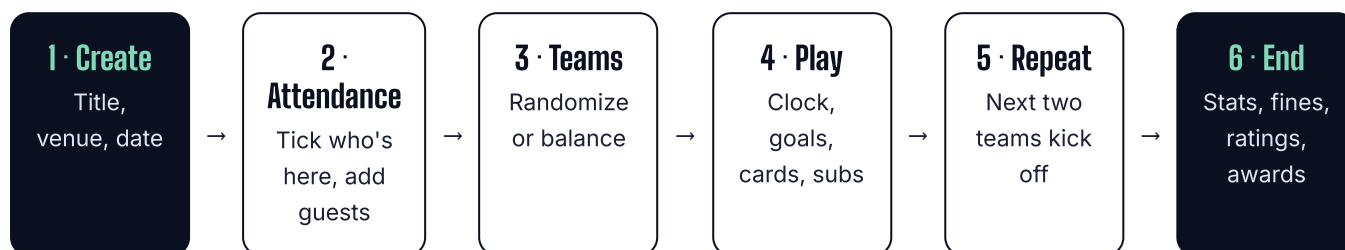

Running a match day

The most important chapter for committee members: everything you do at the pitch, one step at a time.

- Create the session
- Take attendance
- Add guests
- Pick balanced teams
- Run the game clock
- Log goals, assists and cards
- Make substitutions
- End the match day

How a match day works

A **match day** is one session at the pitch. It holds who turned up, the teams, and every game played that day. Games are short: by default **10 minutes, first to 2 goals wins**, with **6 players a side**. You can change these in Settings.

Nothing is lost if you close the page

Every tap is saved to the server as you go, and **the game clock keeps running** even if you lock your phone, switch apps, reload or sign out. Come back to **Match Day** and pick **Resume an in-progress match day**.

1

Open Match Day and create the session

Open **Match Day** from the menu (or **Start a match day** on the dashboard). Fill in a **Title** (e.g. *Saturday Session #14*), the **Venue** (pre-filled if a default venue is set in Settings) and the **Date**, then press **Save & continue**.

If a match day is already running, it's listed at the top under **Resume an in-progress match day**. Click it to carry on instead.

Fig 6.1 Resume list and the empty form

Fig 6.2 Filled in and ready to save

2

Take attendance: "Who's present?"

Tick every squad player who turned up. Each row shows the player's photo, number, position and current **rating**. Use **Select all** or **Select none** to save time.

Someone new joining the squad today? Press **+ Add new player**. They're added to the squad *and* marked present in one go.

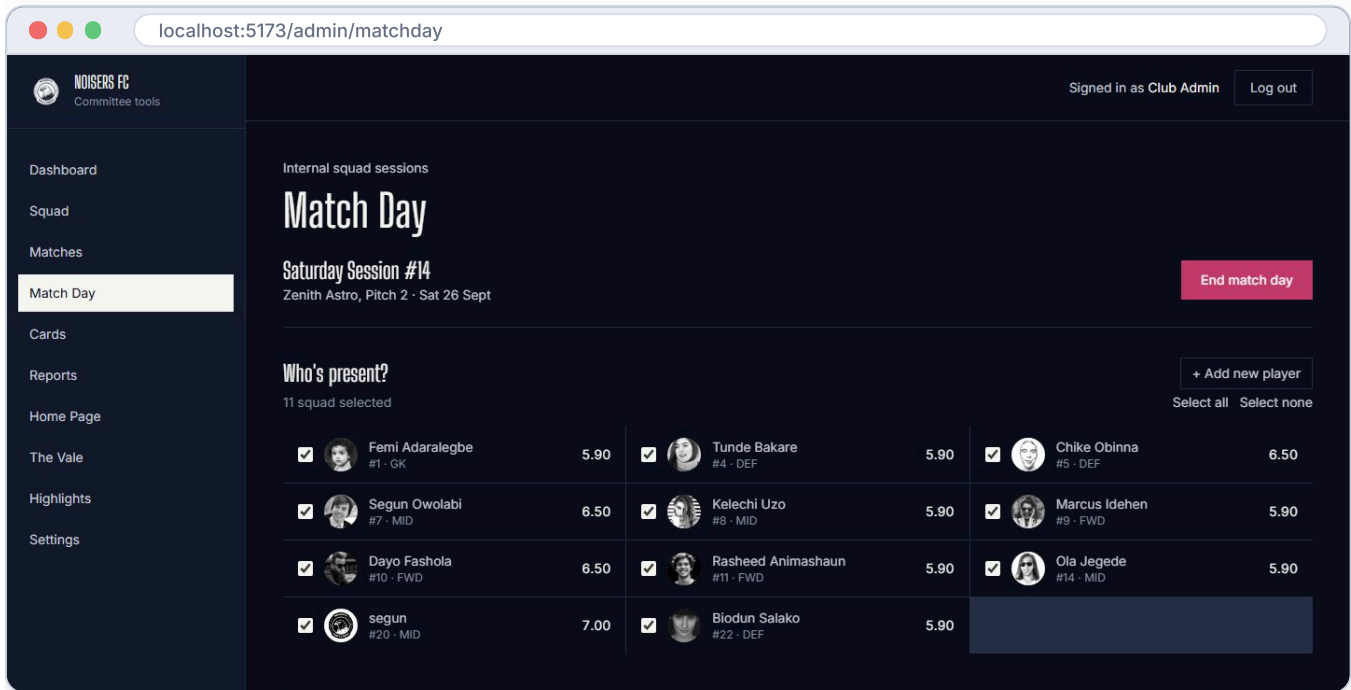

Fig 6.3 Eleven squad players ticked and one guest added

3

Add guests (people outside the squad)

For friends or trialists who aren't in the squad, press **+ Add guest**. Each guest gets an id like **guest-1**; type their real name in the box so it reads nicely in the results. Press **Remove** to take a guest off.

i

Guests are "off the books"

Guests can score, assist and be carded during games, but they **don't get a rating, stats or fines**. Only squad players do.

4

Pick the teams

Choose how teams should be made, then press **Randomize teams** :

MODE	WHAT IT DOES	BEST FOR
Fully random	A simple shuffle, no balancing	Casual sessions
By rating	Hands each player, strongest first, to the team with the lowest rating total so far, so strength evens out	Competitive, even games
By position	Spreads goalkeepers, defenders, midfielders and forwards evenly across teams	Proper shapes on every side

Teams fill up to the team size (6 by default) one after another; only the **last** team can be smaller. So 14 players make Team A (6), Team B (6) and Team C (2). Guests are placed after the squad players, topping up whichever team has the most room.

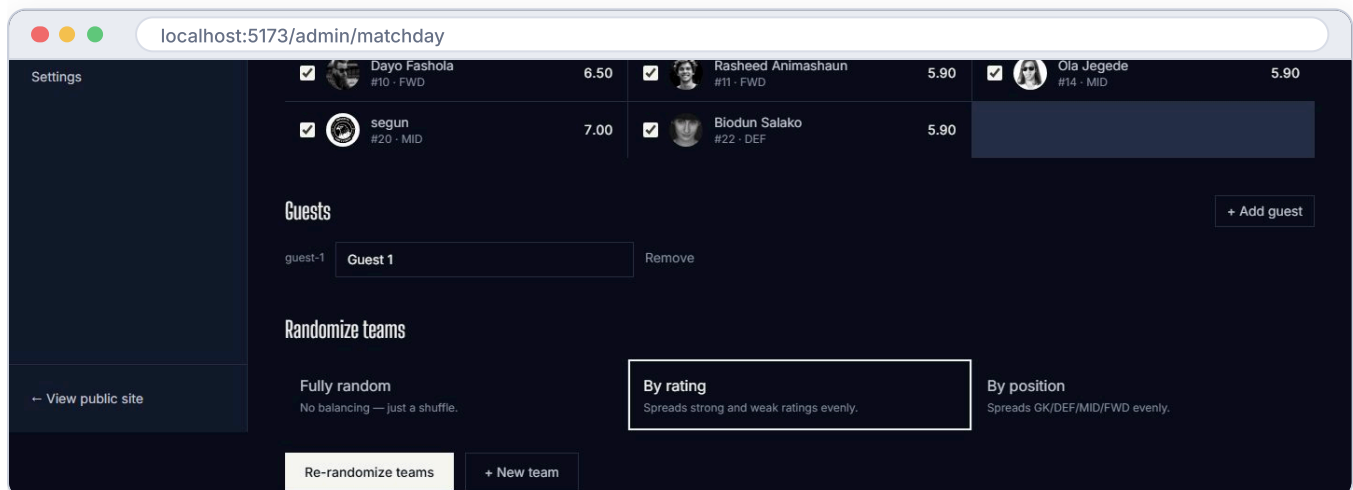

Fig 6.4 "By rating" selected: two balanced teams of six

Fine-tuning the teams

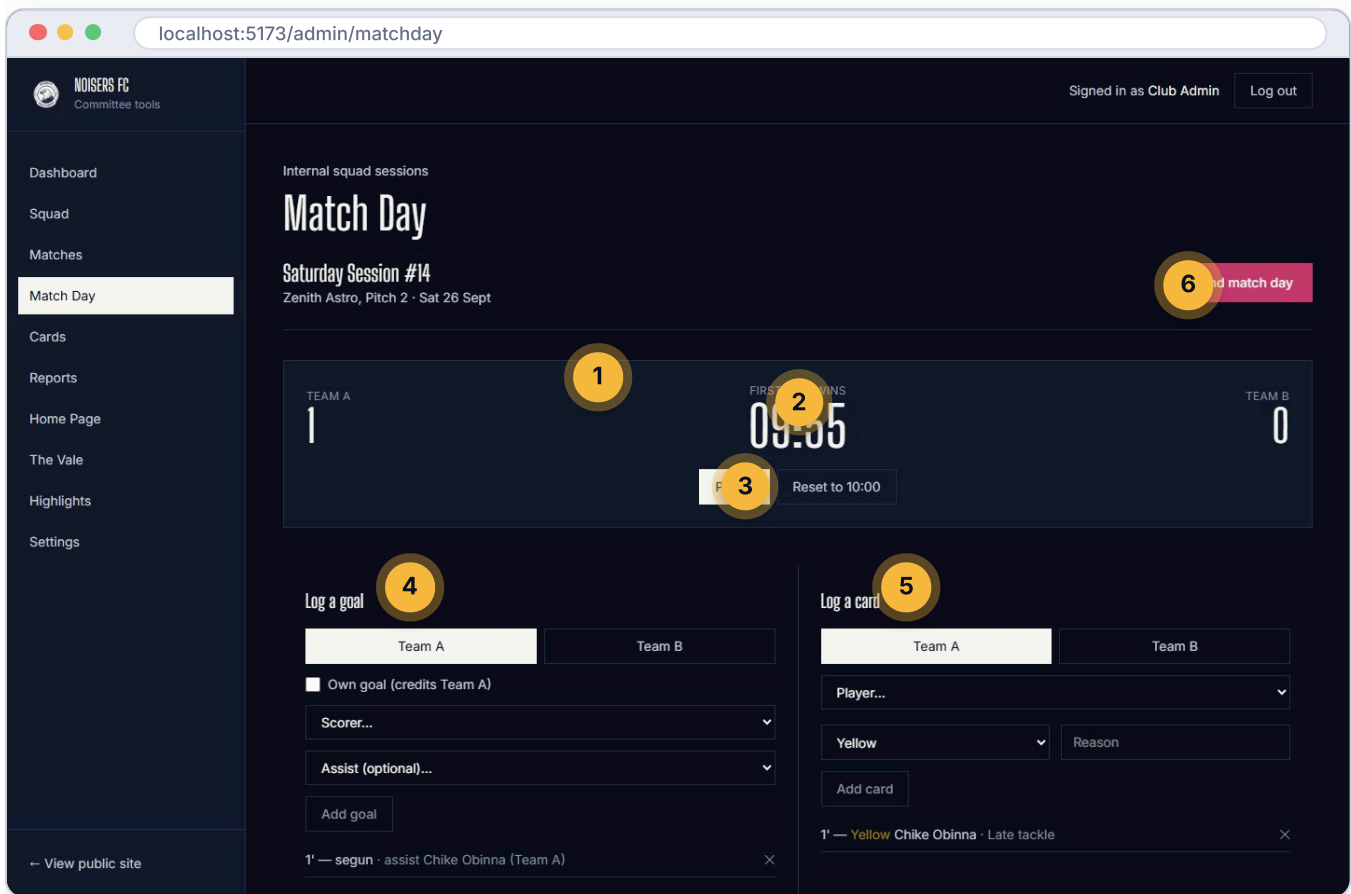

- **Don't like the split?** Press **Re-randomize teams** as many times as you like.
- **Rename a team:** click its name (e.g. "Team A") and type.
- **Move someone out:** click the X next to their name.
- **Late arrival:** tick them present, then use **+ Add player (late arrival)...** under a team with space.
- **Extra team:** press **+ New team** to add an empty one.
- **Three or more teams?** Two drop-downs appear, **Kicking off — Side 1** and **Side 2**, so you can choose who plays first.

When you're happy, press the green **Start match — 10:00 on the clock** button.

5

Run the game

The live game screen puts the scoreboard and clock at the top. On a phone it **sticks to the top of the screen** while you scroll.

1 Team names and live score

2 Countdown clock and the win rule ("First to 2 wins")

3 **Start / Pause** and **Reset to 10:00**

4 Log a goal, with scorer, assist and own goal

5 Log a card: yellow or red, with a reason

6 End the whole match day (see step 8)

Fig 6.5 A game in progress: 1-0 with a goal, an assist and a yellow card logged

- Press **Start** to kick off; the button changes to **Pause**. When the clock reaches 00:00 it says **"Time's up"**.
- A game **ends automatically** the moment one team reaches the winning number of goals.
- If time runs out first (or you want to stop early), press the red **End match** button at the bottom. A level score counts as a **draw**.

6

Log goals, assists and cards

To log a goal:

1. In **Log a goal**, tap the team that **scored**.
2. Pick the **Scorer...** from the list (only that team's players are shown).
3. Optionally pick who made the **Assist**.
4. Press **Add goal**. The minute is filled in from the clock.

Own goal? Tap the team that *benefits*, tick **Own goal**, then pick the player (from the other team) who put it in their own net.

To log a card: in **Log a card**, tap the team, pick the **Player...**, choose **Yellow** or **Red**, type a short **Reason** (e.g. "Late tackle") and press **Add card**.

Made a mistake? Every goal and card appears in a list underneath. Press X to remove it.

The screenshot shows a web browser window at localhost:5173/admin/matchday. The interface is for a match titled "Saturday Session #14" at Zenith Astro, Pitch 2, on Sat 26 Sept. The score is 1-0, with Team A leading. The clock shows 09:54. There are buttons for "Pause" and "Reset to 10:00".

On the left is a sidebar menu with options: Match Day, Cards, Reports, Home Page, The Vale, Highlights, and Settings. At the bottom of the sidebar is a link to "View public site".

The main content area has two panels for logging events:

- Log a goal:** This panel has tabs for Team A and Team B. It includes a checkbox for "Own goal (credits Team A)". Below this are dropdown menus for "Scorer..." and "Assist (optional)...". An "Add goal" button is at the bottom. A list below shows a logged goal: "1' — segun · assist Chike Obinna (Team A)" with an "X" icon to remove it.
- Log a card:** This panel also has tabs for Team A and Team B. It includes a dropdown for "Player...", a dropdown for "Yellow" (with a red card icon visible), and a text input for "Reason". An "Add card" button is at the bottom. A list below shows a logged card: "1' — Yellow Chike Obinna · Late tackle" with an "X" icon to remove it.

At the bottom of the main content area is a "Substitute" panel.

In the top right corner, there is a red button labeled "End match day".

Fig 6.6 Goal and card panels, the substitute panel and the End match button

7

Substitutions and the next game

In **Substitute**, tap the team, pick the **Player off...** and a **Player on (bench)...** (anyone present who isn't in either team), then press **Substitute**.

When a game finishes you're taken back to the teams screen. Its score now appears under **Played so far**. Choose the next two sides and press **Start match** again. Play as many games as you like.

8

End the match day

When the session is over, press the red **End match day** button at the top and confirm. Any game still running is finished, and the match day becomes a **view-only record** under **Matches**.

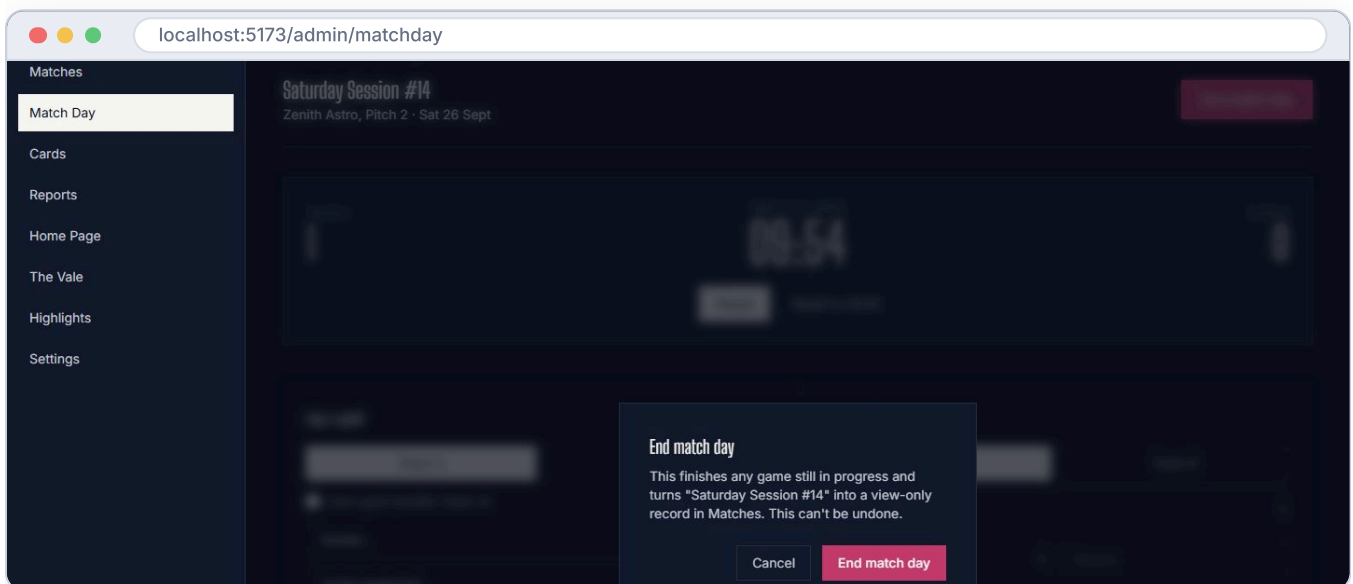

Fig 6.7 The confirmation before ending a match day

Ending can't be undone

Once ended, a match day can't be reopened or edited. Double-check the goals and cards first. If something has gone badly wrong, the whole match day can be removed from **Matches** (or Settings → Danger zone), which reverses its stats, fines, ratings and awards.

What happens when you end a match day

Three things happen automatically on the server (each can be switched off in Settings):

Cards become fines

Every card given to a squad player is filed under **Cards** with the fine amount (£2,000 yellow / £5,000 red by default), marked unpaid.

Ratings move

Each squad player's rating goes up or down based on wins, losses, goals, assists and clean sheets (Chapter 9 explains how).

The Vale updates

Team of the week, player of the week, most improved and the weekly leaders are rewritten from this match day.

Appearances, goals, assists and clean sheets are counted as soon as **each game** finishes, so the squad stats are up to date during the session as well.

site

Fig 7.2 The Add player form

- **Edit** changes a player's details. Ratings move automatically after each match day, but you can override one here.
- **Remove** deletes the player after a confirmation.
- **Export CSV** downloads the squad as a spreadsheet file you can open in Excel or Google Sheets.

Matches: match day history

Matches lists every match day with its title, venue, date, number of games and status (**Live** or **Ended**). Press **View details** to open a panel with the guests, each game's teams and score, and every goal and card.

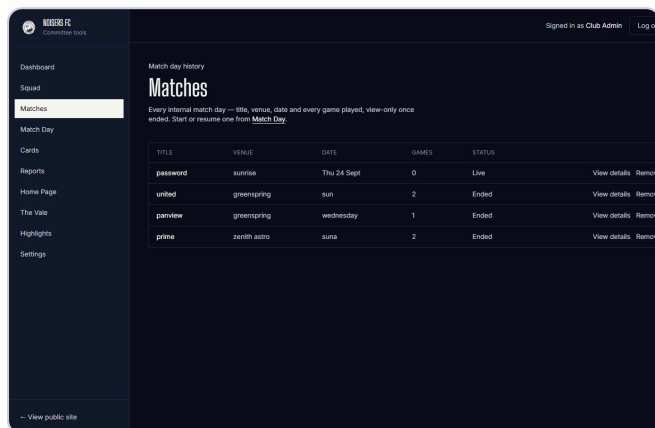

Fig 7.3 Match day history

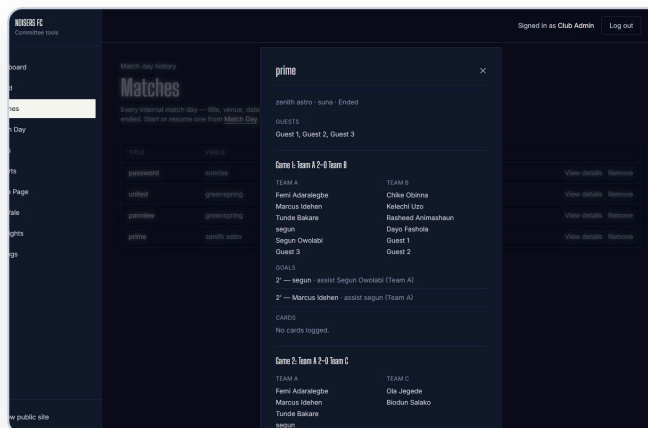

Fig 7.4 The details panel for one match day

! Removing a match day undoes everything it did

Remove deletes the match day permanently **and** reverses its effects: its stats disappear, the fines it created are deleted, player ratings move back and The Vale is rebuilt if needed. It's the same clean-up as **Settings** → **Danger zone** (Chapter 9).

Cards & fines

The **Cards** screen is the club's disciplinary book. At the top: **Outstanding** (unpaid fines), **Collected**, and yellow and red card counts. Below, every card with player, type, reason, date, fine and status.

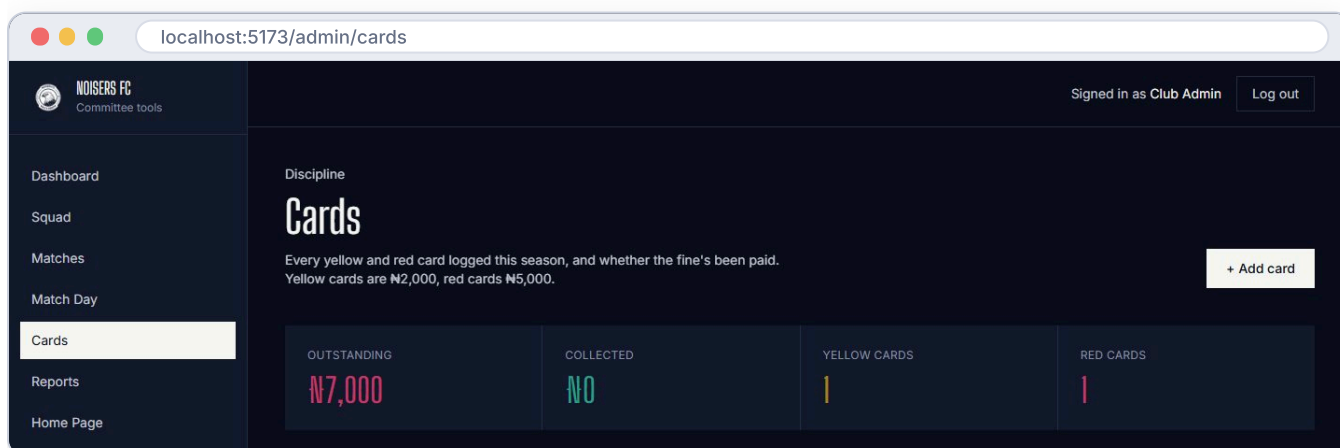

Fig 7.5 The Cards screen with fine totals and filters

- **Filter** with **All**, **Unpaid**, **Paid**, **Yellow** or **Red**.
- **Mark a fine as paid** by clicking its status button; click again to undo. The totals update straight away.

- **Add a card by hand** (e.g. one given outside a match day): press **+ Add card**, choose the player, Yellow or Red, a reason and a date.
- **Remove** deletes a card that was logged by mistake.

Reports

Reports is the season report for the committee: totals for goals, assists, cards and outstanding fines, then charts for **Attacking output** (top scorers, top assists, highest rated), **Squad shape** (players by position) and **Discipline** (most carded players, cards by type).

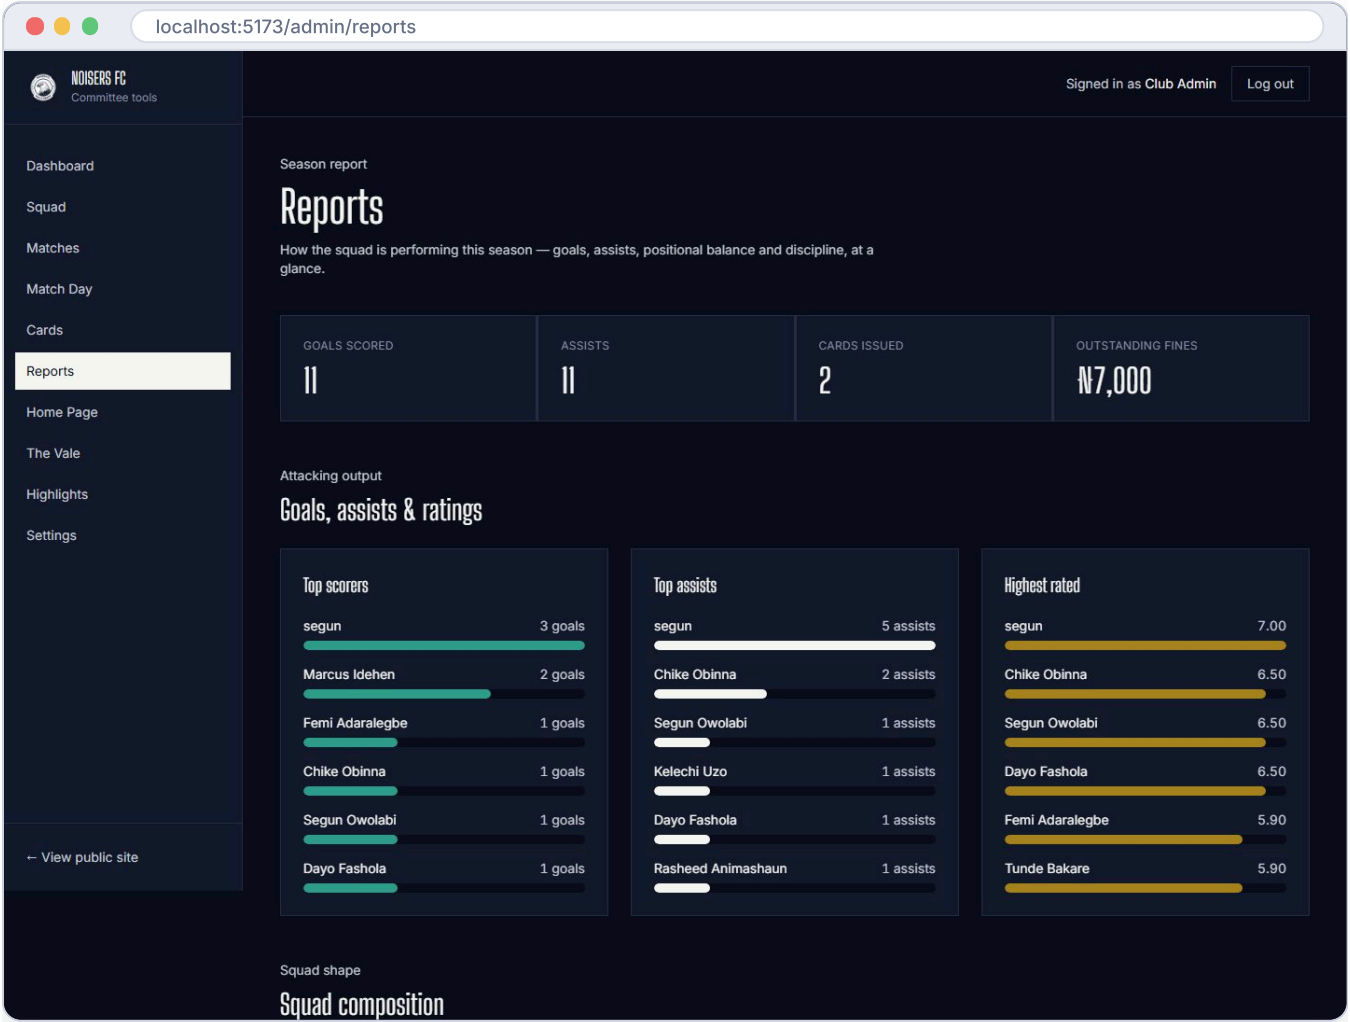

Fig 7.6 The season report

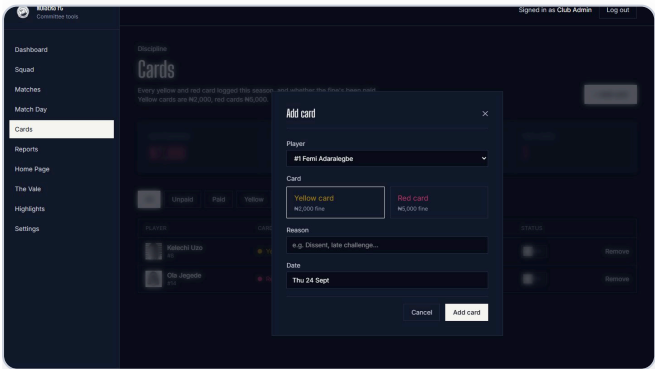

Fig 7.7 Adding a card by hand

Chasing fines?

Filter the Cards screen by **Unpaid** to see exactly who owes what. Players also see their own fines in the portal, so the list is never a surprise.

Editing the website

Change the words and pictures on the public site. No technical skills needed.

- Home page editor
- Uploading images
- Custom stat tiles
- Gallery strip
- The Vale awards
- Highlights

The Home page editor

Open **Home Page** in the menu. The editor follows the home page from top to bottom, one panel per section:

PANEL	WHAT YOU CAN CHANGE
Hero	The small line above the headline ("eyebrow"), the big headline, the intro text and the background image
Club in numbers	Show or hide the section, its title and background. The live numbers are counted automatically; you can add your own custom tiles too (e.g. "14 · Wins this season")
Our story	The story heading, text and image
Atmosphere break	The full-width photo and its one-line caption
How match day works	The explainer shown next to the latest match day
Footer	The text after the year (the year is added automatically)
Gallery strip	The "On the pitch" photos on the home page

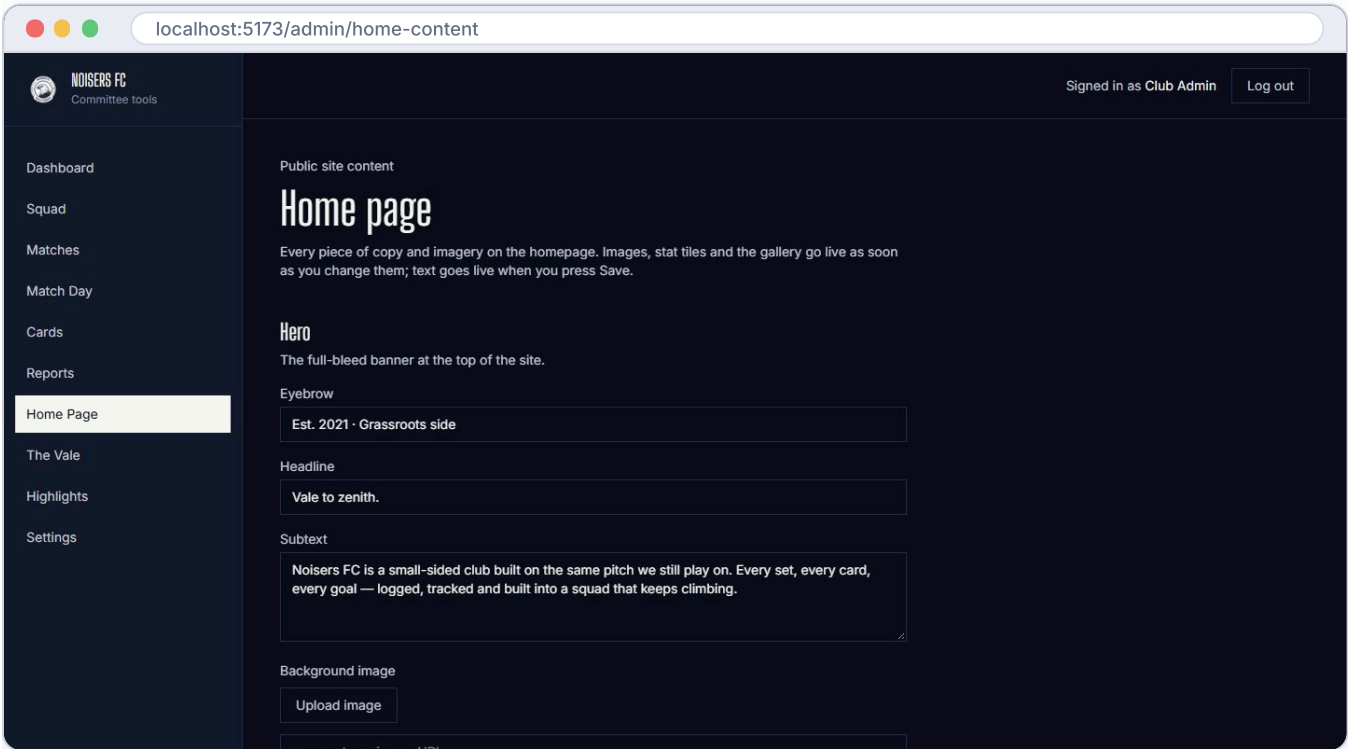

Fig 8.1 The Home page editor: Hero panel

When do changes go live?

Images, stat tiles and the gallery go live as soon as you change them. **Text** goes live only when you press **Save text changes**, so don't forget that button.

Adding an image

Wherever you see **Upload image**, click it and choose a photo from your computer or phone. Or paste the web address of an image into the *"...or paste an image URL"* box underneath.

The Vale editor

The Vale fills itself in whenever a match day ends (if **Update awards automatically** is on in Settings). Open **The Vale** in the admin menu to check the awards or **edit them by hand**: add a photo, correct a line-up or write your own notes.

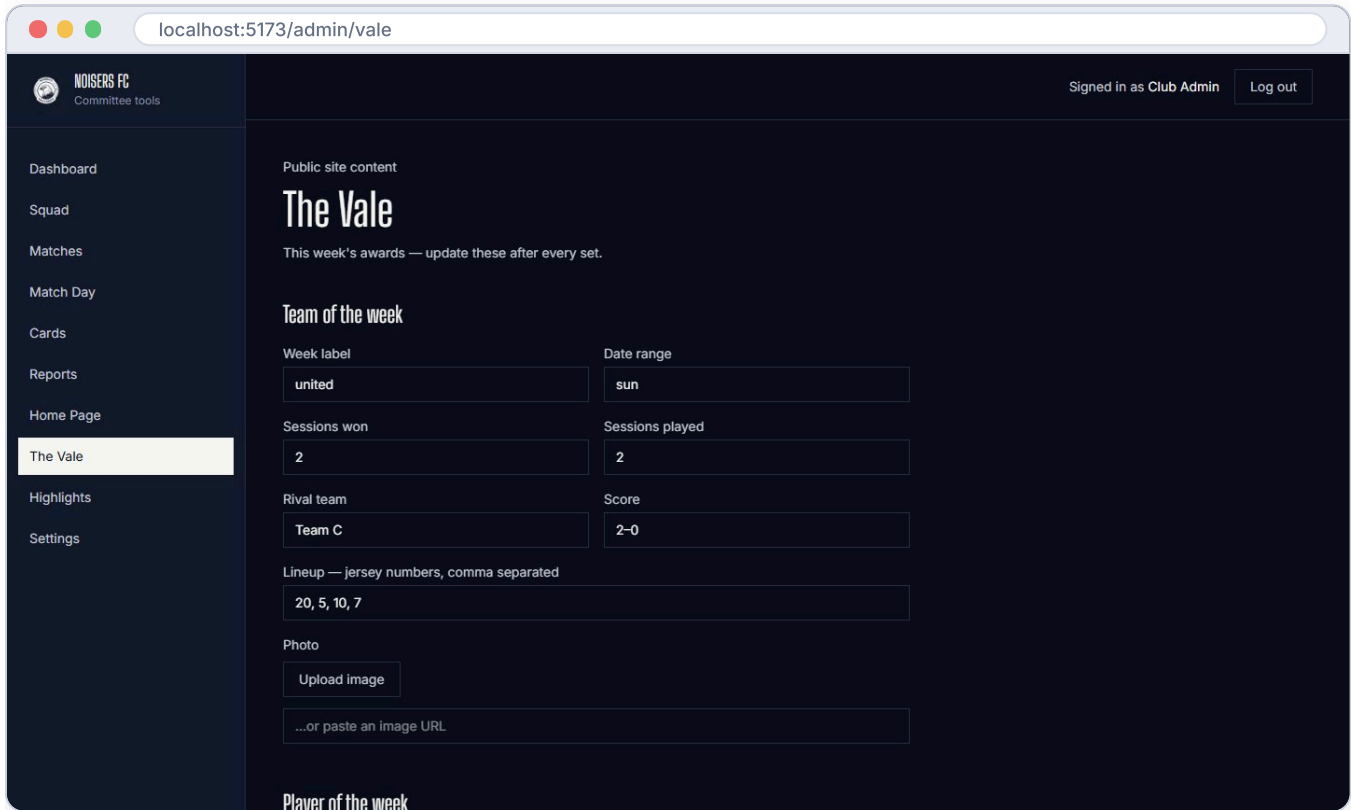

Fig 8.2 Editing Team of the week and Player of the week

- **Team of the week:** week label, date range, sessions won and played, rival team, score, line-up (shirt numbers separated by commas, e.g. `1, 4, 5, 7`) and photo.
- **Player of the week** and **Most improved:** pick the player, write a short note and set the rating.
- **Weekly leaders:** top scorer, top assist and clean-sheet keepers.
- Press **Save The Vale** when you're done.

Hand edits get replaced

With automatic awards on, the next match day you end rewrites The Vale. To keep full manual control, turn **Update awards automatically** off in Settings.

Highlights

Open **Highlights** to manage the public photo and video gallery. Existing items appear as tiles with **Edit** and **Remove**.

Adding a highlight

1. Press **+ Add highlight**.
2. Choose **Photo** or **Video**.
3. Upload an image (or paste its link). For a video, paste the video link and a thumbnail.
4. Write a **Caption**, e.g. *"Idehen's second of the afternoon"*.
5. Add **Alt text**: a short description of the picture for people using screen readers.
6. Pick a **Category** (Goals, Saves, Skills...).
7. Optional: tick **Tall tile** to make it span two rows in the grid.
8. Press **Add highlight**.

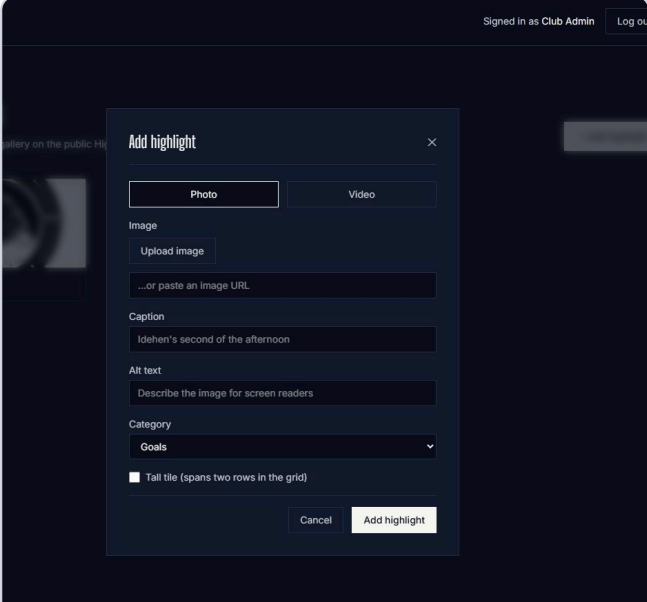

A dark-themed modal window titled "Add highlight" with a close button (X) in the top right corner. It contains two tabs: "Photo" (selected) and "Video". Under the "Photo" tab, there is an "Image" section with an "Upload image" button and a text input field for pasting an image URL. Below this is a "Caption" text input field containing the text "Idehen's second of the afternoon". Underneath the caption is an "Alt text" text input field with the placeholder "Describe the image for screen readers". Below that is a "Category" dropdown menu currently set to "Goals". At the bottom left of the form is a checkbox labeled "Tall tile (spans two rows in the grid)". At the bottom right are "Cancel" and "Add highlight" buttons.

Club settings

Open **Settings**. A side menu jumps between sections. Settings are **shared by every admin on every device**. Change what you need and press **Save**; a "Settings saved" message confirms it. Committee members can view the settings but not change them.

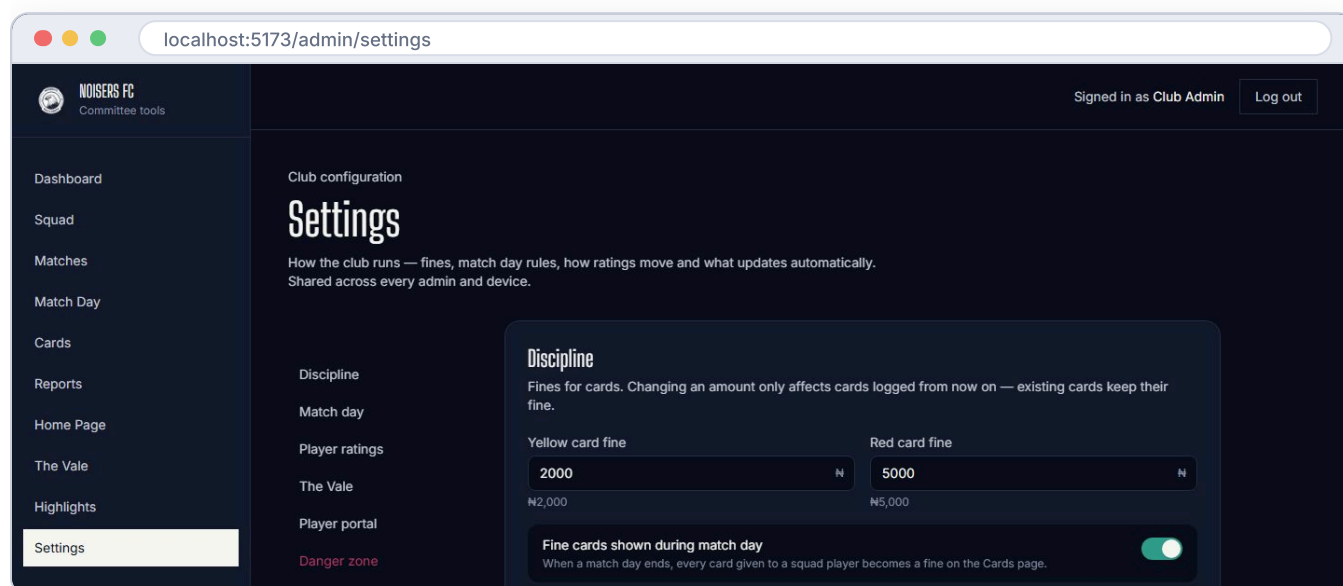

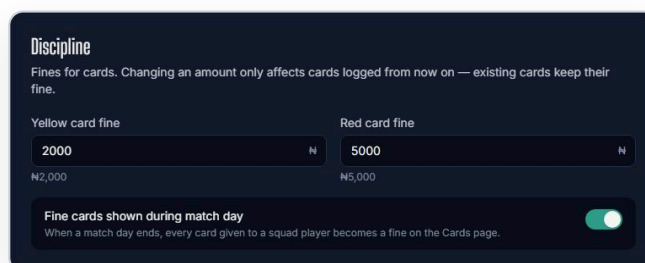

Fig 9.1 The Settings screen

Discipline

Yellow card fine	Default ₦2,000
Red card fine	Default ₦5,000
Fine cards shown during match day	When on, ending a match day turns each card given to a squad player into a fine.

Changing an amount only affects **new** cards. Existing cards keep their original fine.

Match day rules

Players per team	Default 6
Goals to win a game	Default 2. The game ends when a team reaches this
Game length	Default 10 minutes
Team picking	Which mode is pre-selected: Random, By rating or By position
Default venue	Pre-filled when creating a match day

The screenshot shows the 'Match day' settings interface. It includes fields for 'Players per team' (6), 'Goals to win a game' (2), and 'Game length' (10 min). A note states: 'A game ends when a team reaches 2 goals or the 10-minute clock runs out, whichever comes first.' Under 'How teams are picked by default', there are three buttons: 'Random' (selected, with subtext 'Just a shuffle'), 'By rating' (with subtext 'Even out strength'), and 'By position' (with subtext 'Even out GK/DEF/MID/FWD'). The 'Default venue' field is pre-filled with 'e.g. Zenith Astro, Pitch 2' and has a note: 'Pre-filled when starting a new match day. Leave blank for none.'

Games already in progress keep the rules they started with (except the clock length).

Player ratings: how they work

Every squad player has a rating between **4.0** and **9.5**. New players start at **6.0**. When a match day ends, each player earns (or loses) **points** across that day's finished games:

EVENT	DEFAULT POINTS
Team wins a game	+0.10 for every player
Team loses a game	-0.10 for every player
Draw	0
Goal scored	+0.12
Assist	+0.08
Own goal	-0.08
Clean sheet (team conceded 0)	GK +0.15 · DEF +0.12 · MID +0.05 · FWD 0

The screenshot shows the 'Player ratings' settings interface. It includes a toggle for 'Update ratings automatically' which is turned on. Below it, 'Starting rating for new players' is set to 6.0 and 'Most a rating can move in one match day' is set to 0.5. Under 'Points per game', there are fields for 'Win' (0.1), 'Loss' (0.1), and 'Goal' (0.12). There are also fields for 'Assist' (0.08) and 'Own goal' (0.08). Under 'Clean sheet bonus by position', there are fields for 'Goalkeeper' (0.15), 'Defender' (0.12), 'Midfielder' (0.05), and 'Forward' (0). An 'Example, before scaling' section shows: 'A defender who wins 2-0 and assists once: +0.30' and 'A forward who scores twice but loses 2-3: +0.14'. A note states: 'Gains shrink as a rating nears 9.5 and losses shrink near 4.0, so ratings drift back to the middle unless a player keeps performing.' At the bottom, there is a link to 'Restore default points'.

Then two safety rules apply:

- ① **Scaling:** gains get smaller as a rating nears 9.5 and losses get smaller as it nears 4.0, so ratings drift back toward the middle unless a player keeps performing.
- ② **Cap:** a rating can move at most **0.5** in either direction in one match day.

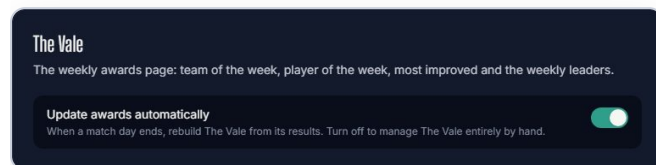

Example: a defender wins 2 games and loses 1, keeps two clean sheets and assists once:

$$(2 \times 0.10) - 0.10 + (2 \times 0.12) + 0.08 = \textbf{+0.42 points} \text{ before scaling.}$$

Every weight can be changed. **Update ratings automatically** switches the whole system on or off, and **Restore default points** puts the numbers back.

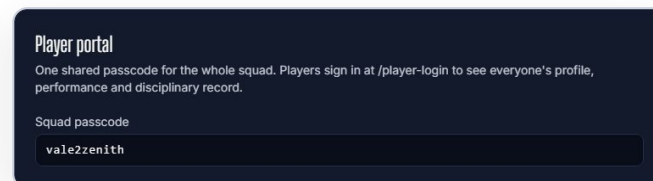

The Vale

Update awards automatically: when on, ending a match day rebuilds The Vale from its results. Turn it off to manage The Vale entirely by hand.

Player portal

The **Squad passcode** is the one password the whole squad uses at `/player-login`. Change it here and share the new one with players.

About the passcode

In this version, the squad passcode is saved **in the browser where you change it**, not on the server. Other phones and computers keep using the previous passcode until it's changed there too. Check with your technical team before relying on a passcode change.

Danger zone (admins only)

Permanently **delete a match day**, for example a test session or one logged by mistake. Deleting does a full clean-up:

- removes the match day's appearances, goals, assists and clean sheets from everyone's stats;
- deletes the fines created from its cards;
- moves player ratings back to where they were before it;
- if The Vale is showing it, rebuilds the weekly awards from the previous match day.

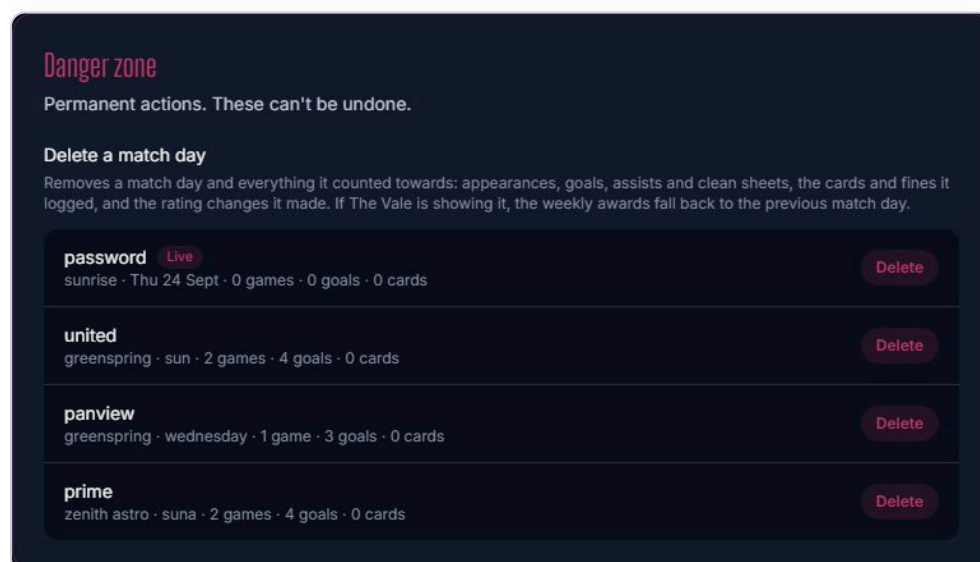

Fig 9.2 Deleting a match day asks for confirmation first

This can't be undone

Press `Delete` next to the match day, read the summary carefully, then press `Delete permanently`.

Frequently asked questions

For players

I don't know the passcode.

Ask any committee member. It's shared with the whole squad.

Why did my rating go down?

Your team lost more games than it won that day, or you scored an own goal. Open your player page → **Form** to see results. Ratings drift back toward the middle over time, so keep playing.

I scored but it isn't showing.

Stats count once each game is finished. If it's still missing, the goal may have been credited to someone else. Ask the committee to check the match day.

How do I pay a fine?

Pay the committee as usual. They mark it paid in the app, and it disappears from your "owed" total.

My shirt isn't pinned on my new phone.

The pinned shirt is remembered per device. Tap your number again.

For the committee

My phone died mid-game. Is the clock lost?

No. The clock and every goal and card are saved on the server. Open **Match Day** on any device and resume.

I logged a goal for the wrong player.

While the game is live, press X next to the goal and log it again. After the match day has ended, it can't be edited.

Someone arrived late.

Tick them present, then use **+ Add player (late arrival)...** on a team with space, or bring them on as a substitute.

Do guests get fined?

No. Guests have no fines, ratings or stats.

We ran a test match day. How do we remove it?

Press **Remove** next to it in **Matches** (or an admin can use Settings → Danger zone). This also reverses its fines, ratings and awards.

Troubleshooting

WHAT YOU SEE	WHAT TO DO
"...check your connection and try the action again"	The last change may not have saved. Check your internet, then repeat the action.
"That passcode isn't right"	Check spelling and capitals; ask the committee for the current passcode.
"Couldn't sign in"	Check your email and password. The admin can reset your account.
Settings fields are greyed out	You're signed in as committee. Only admins can change settings.
Home page text didn't change	Press Save text changes . Text isn't saved automatically.
Pages look empty or out of date	Refresh the page. If still empty, the server may be offline; contact the technical team.

Glossary

TERM	MEANING
Match day	One session at the pitch. Holds attendance, teams and all the games played that day.
Game	One short match between two teams within a match day (10 min, first to 2 by default).
Set / session	Informal names for a match day.
Squad player	A registered club member with a shirt number, rating and stats.
Guest	Someone playing on the day who isn't in the squad. No stats, rating or fines.
Appearance ("Apps")	One finished game a player took part in.
Clean sheet	A finished game in which the player's team conceded no goals.
Rating	A score from 4.0 to 9.5 showing current form, moved automatically after each match day.
Form	A player's recent results: W (win), D (draw), L (loss).
The Vale	The weekly awards page. The name comes from the club motto, "Vale 2 Zenith".
Team of the week	The side that won the most games on the latest match day.
Fine	Money owed for a card: £ 2,000 yellow / £ 5,000 red by default.
Outstanding	Fines not yet paid.
Portal	The squad-only area at <code>/portal</code> .
Committee / Admin	Staff roles. Admins can also change Settings and delete match days.
Hero	The big banner at the top of the home page.

For the technical team

A short orientation for whoever installs or maintains the app.

How it's built

PART	TECHNOLOGY	FOLDER
Website & admin	React 19 + TypeScript, Vite, Tailwind CSS v4, React Router	/frontend
API	Laravel (PHP) REST/JSON API	/backend
Database	MySQL (database <code>noisers</code>)	via XAMPP
Staff sign-in	Laravel Sanctum tokens	POST /api/login
Uploaded images	Laravel public storage	backend/storage

Running it on your computer

1. Start **MySQL** from the XAMPP control panel.
2. Backend: in `backend/` run `composer install`, copy `.env.example` to `.env`, then `php artisan key:generate`, `php artisan migrate --seed`, `php artisan storage:link` and `php artisan serve` (API on `http://localhost:8000`).
3. Frontend: in `frontend/` run `npm install` then `npm run dev` (site on `http://localhost:5173`).
4. Sign in at `/login` with the seeded admin `admin@noisersfc.test` / `password`, then change the password.

Pointing the site at a different API

Set `VITE_API_URL` (e.g. `https://api.yourclub.com/api`) when building the frontend. The backend's `FRONTEND_URL` must match the site's address.

Where the key logic lives

WHAT	FILE
Team balancing (random / rating / position)	<code>frontend/src/lib/matchDay.ts</code>
Match day screen	<code>frontend/src/pages/admin/MatchDay.tsx</code>
Game clock (server-persisted)	<code>frontend/src/lib/useMatchTimer.ts</code>
End-of-match-day processing	<code>backend/app/Support/MatchDayFinalizer.php</code>
